PROJECTS

Laser Security System
It is a laser-based security system. This will secure an item that will be kept in between the laser rays, Also planning to make it more effective by adding some more features like Beap sound, etc.

Machine Learning Project on Dragon Real Estate Dataset
This project develops and evaluates the performance and predictive power of a model trained and tested on data collected from Dragon Real Estate.
By using different Model (eg. DecisionTreeRegressor(), LinearRegression())...........

Face Mask Detection system using Deep Learning
The main objective of the face detection model is to detect the faces of individuals and conclude whether they are wearing masks or not at that particular moment when they are captured in the image.
