

Skills

- Java, MySQL, Microservices, Git, Docker, postman, Spring Boot, MVC, SQL, GitHub, REST API, AWS, PostgreSQL, Linux

Experience

Scholar

Oct 2023 - Mar 2025

Scaler Academy

Specialized in Software Development & Problem Solving

Coursework: Data Structures & Algorithms, Low-Level Design (LLD), Object-Oriented Programming (OOP), Database Management, Multithreading, Concurrency, Design Patterns, REST API Development, Microservices Architecture, Spring Boot.

- Solved 500+ algorithmic problems with a 94% success rate, showcasing strong problem-solving and analytical skills.
- Ranked in the top 5% of learners, demonstrating a commitment to excellence and continuous learning.

Analyst

Feb 2021 - Oct 2023

HCLTech

- Coordinated responses to 370+ major IT incidents, demonstrating effective problem-solving and collaboration under high pressure.
- Led cross-functional teams, ensuring swift and efficient resolution during critical situations, adhering to Agile Methodologies.
- Integrated automated shift scheduling tools (SendWordNow), improving communication efficiency across project teams.
- Conducted root-cause analyses for critical incidents, providing strategic inputs for long-term system stability.
- Created comprehensive incident reports and detailed analyses, providing actionable insights to prevent recurring issues.
- **Transitioned from incident management to software development** by completing Scaler's intensive course, acquiring expertise in Java, Spring Boot, and problem-solving.

Projects

E-Commerce Application

🔗 <https://github.com/PacificK777/EcommerceApplication>

- Architected and integrated over 3 microservices to streamline user management, product cataloging, and payment processing, resulting in an enhanced user experience.
- Implemented Stripe, RazorPay payment gateway integrations and OAuth 2.0 authentication for secure transactions.
- Engineered an event-driven email service using Kafka for large scale real-time notifications.
- **Key Technologies:** Java, Spring Boot, JPA, Kafka, Microservices.

Healthcare Microservices Platform

🔗 <https://github.com/PacificK777/patient-management>

- Architected a comprehensive healthcare system using microservices architecture with specialized services for patient management, authentication, billing, and analytics.
- Designed inter-service communication using both RESTful APIs and gRPC for efficient data exchange between components.
- Implemented containerized deployment with Docker for consistent operation across development and production environments.
- Built secure authentication flows with dedicated auth-service for protecting sensitive healthcare data.
- Utilized SQL databases for persistent storage and integrated data persistence across multiple services.
- **Key Technologies:** Java, Spring Boot, Microservices, Maven, SQL, gRPC, Protobuf, Docker.

Achievements

- ITIL® Foundation Certificate in IT Service Management (PeopleCert-AXELOS)
- Received Star award for top technical contributions in 2022.
- Awarded the 2Good Award in HCL Achievers League 2023 for maintaining the highest team rating consistently over 2 years.
