EDUCATION

SR Institute of Technology, Lucknow

2019 - 2023

B.Tech - Computer Science and Engineering *Percentage - 82*

Lucknow, Uttar Pradesh, India

EXPERIENCE

Tantrash Technologies Pvt Ltd

Feb 2024 - Present

Role - Flutter Developer

Lucknow, Uttar Pradesh, India

- Developed and maintained mobile applications using Flutter, integrating **RESTful APIs**, state management with Provider.
- Implemented custom widgets and reusable components to enhance code maintainability and UI consistency across the app.

Invisor Technologies Pvt Ltd

Aug 2023 - Jan 2024

Role - Flutter Intern

Lucknow, Uttar Pradesh, India

- Integrated third-party APIs and services, including **REST APIs**, for data fetching and user authentication.
- Collaborated with senior developers to implement various features, ensuring high-quality and efficient code.
- Worked on building custom widgets and reusable components to maintain code consistency and reusability.
- Successfully completed a **6-month Flutter Internship**, earning certification for hands-on experience in Flutter development and mobile app design.

PROJECTS

RAV Office (Office management) | Flutter (Dart Language), VS Code(IDE), UI, Restful APIs

- In the RAV Office project, I developed a comprehensive Task model that included features such as task creation, task assignment, and task updates.
- I implemented functionalities for assigning tasks to employees, updating task details, and managing a task list.
- Additionally, I integrated a comment box for each task, enabling seamless communication and feedback on tasks.

Billing App (Invoice App) | Flutter (Dart Language), VS Code(IDE), UI, Restful APIs

- Developed a billing application with features including sales list management, invoice creation, customer registration and editing, and outlet profile management.
- Streamlined billing processes by enabling efficient tracking of sales, invoicing, and customer and outlet information.

RAV Organic (E-Commerce app) | Flutter (Dart Language), VS Code(IDE), UI, Restful APIs

- Developed and implemented a comprehensive e-commerce application for Rav Organic, covering the entire purchase flow from order placement to return policy management.

Motive8 (Count Steps App) | Flutter (Dart Language), VS Code(IDE), UI, Restful APIs

- Integrated a pedometer package in the Motive8 app to track user steps and convert them into reward points. Enabled users to redeem accumulated points for incentives.

Sanmarg (Spiritual Streaming App) | Flutter (Dart Language), VS Code(IDE), UI, Restful APIs

- I developed the Sanmarg app using Flutter, which features YouTube videos, live streaming, and profiles of spiritual speakers (pravakta). I implemented dynamic content fetching and designed a user-friendly UI, integrating APIs for real-time updates and using Provider for state management.

TECHNICAL SKILLS

Languages: Dart, JavaScript(Basic),

Developer Tools: VS Code, Android Studio, Figma(for app designing)

Development: Flutter framework

Version API Integration Restful APIs

UX/UI:Material Design, Responsive Design Principles.
