

Danish Anjum

Software Engineer

Hyderabad 📍|9479326051📞 | danjum170@gmail.com ✉

Summary

Skilled .NET Developer with expertise in Experienced in C#, ASP.NET MVC/Core, Entity Framework, SQL Server, and Web API. full-stack development, including designing, debugging, and optimizing applications for performance and scalability. Adept at writing clean, maintainable, and scalability e code while collaborating with cross-functional teams to deliver efficient and innovative solutions. Passionate about leveraging technology to solve complex problems and drive impactful results.

Skills

C,C++, C#, ASP.NET MVC, ASP.NET Core, Entity Framework, Web API, HTML, JQuery, SQL Server, Azure DevOps.

Experience

BigPerl Solutions Pvt Ltd.

Software Engineer

- Designed, developed, and optimized C# code using ASP.NET MVC 4.8 and .NET Core 7 to modernize applications.
- Participated in code reviews to ensure code quality and adherence to best practices.
- Managed code versions for multiple releases and production deployments using Azure DevOps.
- Identified and resolved issues in the existing application prior to release, improving system stability and performance.
- Served as the primary point of contact for technical support, ensuring timely issue resolution and maintaining high client satisfaction.
- Conducted comprehensive system testing to ensure bug-free and seamless production releases.

Projects

LIMS (Laboratory Information Management System)

Company: BigPerl Solutions Pvt Ltd

Domain: Healthcare & Pharmaceuticals

LIMS is a web-based laboratory management system designed to streamline lab operations, manage test samples, track reports, and ensure compliance with regulatory standards. Built using technologies like Angular, ASP.NET MVC, C#, .NET Core, and SQL Server, the system automates workflows, improves data accuracy, and enables efficient report generation. Key responsibilities included developing modules for sample tracking and test management, implementing role-based authentication, optimizing the database, integrating RESTful API with third-party lab equipment, and ensuring compliance with FDA, NABL, and ISO 17025 standards. The project enhanced operational efficiency, data reliability, and regulatory adherence for Caliber's laboratory processes.

Role:

- Developed modules for sample tracking, test management, and result analysis.
- Implemented role-based authentication using Identity Framework.
- Optimized SQL Server database using stored procedures, triggers, and views.
- Automated report generation using SSRS/Crystal Reports.
- Ensured compliance with FDA, NABL, and ISO 17025 standards.

Technology Used :

- C#,Asp.Net MVC, Sql Server, Java-Script, Razor view page.

Education

Anna University

Computer Science
and Engineering

May2016 -Nov2020
Bachelor of Engineering

HSC (BSEB)

June 2015 -Mar 2016
Higher Secondary School

SSC (BSEB)

June 2013 – Mar 2014
Secondary School

Languages

English, Hindi.
