KEY PROJECTS

Unlisted- The Unlisted app provides trade alerts for Bitcoin, catering to the needs of first timers, with performance that impresses any experienced trade. Bitcoin will zig-zag up and down, regularly undoing its big gains. We trade both directions to stack profits both ways. We honestly don't mind if the price goes up or down, to us it's all opportunities to profit.

Givley - At Givley, we have modernized food philanthropy through crowdfunding. Our software platform allows those who are in need to continue their regular routine of shopping for food online from participating grocers. We then empower donors to purchase those grocery carts for families they would like to help. We're putting the problem and solution directly in the hands of those in need and those who want to help, which makes the donating experience more personal.
