SKILLS

PROGRAMMING

- Python
- C++
- Core java
- HTML
- SQL
- Shell Scripting

TOOLS AND TECHNOLOGIES

- Linux
- Kubernetes
- Docker
- Git
- Vs Code
- Openshift
- JIRA

CERTIFICATIONS

- Microsoft Azure 900
- Docker Essentials: A developer introduction by IVM
- Introduction to Git and Github by Coursera

LANGUAGES

- English
- Hindi
- Awadhi

EXPERIENCE

PERSISTENT SYSTEMS | SOFTWARE DEVELOPER

2022 - Present | Pune , Maharashtra

- Worked as a Software developer for client IBM's project **ICCSAP(IBM content collector for SAP)**
- Specialized in **Linux administration**, handling tasks like instance creation, client package installation, and ongoing maintenance .
- **Automated archival and delete logs** generated by different providers using **log archival script in Python .**
- Implemented **error handling** mechanisms to ensure robustness and reliability in automated processes.
- Integrated **automated processes** with version control systems like **Git** for efficient collaboration and code management.
- Experience in containerizing applications with **Docker and deploying them on Kubernetes and OpenShift, utilizing CI/CD pipelines** for automation and monitoring/logging solutions for performance tracking and scaling.

PERSISTENT SYSTEMS | SOFTWARE DEVELOPER INTERN

2021 | Pune, Maharashtra

- Worked on technologies including **Java, Git, SQL, Linux, and database tools** with industry experts .
- Integrated backend services with the web app/UI so that the functionalities work as intended.
- Created **Employee Project Management System** Implemented the webservises so that employees get assigned/deallocated in the real time and same will be reflected on the portal.
- Received training in these technologies and successfully passed internal tests with a score of over 85%.

PERSONAL PROJECTS

WEATHER FORECAST WEB APPLICATION 2021 | Bhopal , MP

- **Developed a web application** that allows users to check the weather forecast for a specific location.
- A **weather API Dark Sky** used to retrieve real-time weather data for a given location.
- Designed an intuitive and **responsive web interface** using a web framework **Django**, allowing users to easily input locations and view weather forecasts.
- **Deployed the web application to a cloud platform** to make it accessible to users over the internet.

SORTING ALGORITHM VISUALISER 2021 | Bhopal , MP

- **Created an application Sorting Algorithm Visualizer** using **Python and Tkinter**, providing a graphical representation of **sorting algorithms** for enhanced understanding.
- Utilized **Python's object-oriented programming** principles to create modular and scalable code, promoting code readability and maintainability.
- **Designed an intuitive user interface with Tkinter**, ensuring a user-friendly experience while interacting with the sorting algorithm visualizations.
