WORK EXPERIENCE

Mind Power Research And Training Institute

Fullstack Developer

Apr 2023 - Jun 2024

- Developed the Gemologist, Astrologer, Portfolio, and Trayambkeshwar projects, managing both frontend and backend. Achieved a 90% increase in user experience through.
- Crafted 5+ functional websites with high-quality, clean, and reusable code
- I have integrated Google Analytics and payment gateway (PhonePe, Razorpay, Paypal, and PayU) in my projects and also stored location through IP
- Experience using cPanel to manage web hosting

Mind You InfoTech

Full Stack Developer

Oct 2022 - Mar 2023

- Designed and crafted the website front-end via HTML, CSS, and JavaScript, and designed the website architecture and its backend works via PHP Laravel
- We have created a project for Educational purposes and for a Car service provider. We collaborated with our team for both frontend and backend work

CMP Techsseract LLP

Fullstack Developer

Jul 2024 - Present

- Designed and developed a comprehensive Project Management System to streamline project tracking, task assignment, and team collaboration.

EDUCATION

Integral University

Bachelor of Computer Applications

July 2021 - June 2024

I have learned various technical skills like HTML, CSS, PHP, JavaScript, and Python and have put my hands into them by building small projects.

PROJECTS

Prayagraj Mela Authority (PMA)

July 2024 - December 2024

Mahakumbh 2025 Land and Suvidha Allotment System

- Experience the seamless management of land and facility allocations with our state-of-the-art system designed specifically for Mahakumbh 2025.

Key Features:

- **Efficient Land Allotment:** Streamline the process of allocating land to stakeholders with ease.
- **Facility Management:** Simplify the allocation of resources and amenities for participants.
- **Real-Time Tracking:** Monitor allotments and approvals in real time.
- **User-Friendly Interface:** Intuitive design tailored for quick navigation and accessibility.
- **Budget Reports:** Generate detailed reports for better decision-making.
- **Our system ensures transparency, efficiency, and accuracy, contributing to the success of this historic and spiritual event.**

Project Management System

July 2024 - Nov 2024

Effortlessly manage all Uttar Pradesh IT projects with our comprehensive Project Management System. Designed to streamline workflows, enhance collaboration, and drive efficiency, our system offers tailored solutions for tracking, organizing, and optimizing project progress across diverse IT initiatives. Simplify complex processes and achieve success with a centralized, user-friendly platform built for excellence.

Trayambkeshwar

Feb 2024 - Apr 2024

I created an online selling course focusing on gemology and energy-wise scanning of gems, integrating various technologies. Utilized HTML, CSS, Bootstrap, and JavaScript for frontend development, and AJAX with the Laravel Framework in PHP for backend functionalities. Integrated the PhonePe payment gateway and Google Analytics for comprehensive tracking of user interactions. Implemented IP tracking to determine the geographical locations of website visitors.

Astrologer

Created multi-login authentication for SuperAdmins, astrologers, and users, along with creating dynamic services for users. Integrated PayPal payment gateway for seamless transactions.

SKILLS

HTML/CSS, Software Engineering, Laravel, JavaScript, HTML, PHP, Python, Web Application Development, MySQL, GitHub, MVC, Back-End Developers, Webpage Designing, Responsive Design, Development Process, CSS3, HTML5, Standard Development Tools, GitHub, SSH, Linux Basic, Bootstrap, React

Internship

full stack developer

- Proficient in utilizing PHP and Python programming languages for developing server-side applications and implementing efficient solutions
- Demonstrated expertise in utilizing Laravel framework for backend development to create resilient web applications
