Skills

- **Programming Languages:** Python, JavaScript, PHP, SQL
- **Front-End Development:** HTML, CSS, JavaScript, jQuery, React, Bootstrap
- **Back-End Development:** Node.js, Express, Flask, RESTful APIs
- **Databases:** MySQL, SQLite, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, FileZilla, PortX, Bitwise, PyInstaller

Work Experience

Freelance Developer

Sep 2024 - Present

- I build custom web applications using React, Node.js, Flask, and databases like MySQL & MongoDB.

Nigella Softwares, Lucknow

Jul 2020- Jul 2024

Full-Stack Developer

Mar 2022- Jul 2024

- Developed responsive web applications using React, Node.js, Express, and Flask, enhancing service delivery and operational efficiency.
- Designed and managed databases (MySQL, SQLite, MongoDB) and developed RESTful APIs to support application functionality and data flow.
- Mentored junior developers and managed deployments using FileZilla, PortX, and Bitwise.

PHP Developer

Jul 2020- Feb 2022

- Developed and maintained web applications, focusing on both front-end and back-end development to create responsive and user-friendly interfaces.
- PHP, MySQL, JavaScript, Bootstrap, CSS, HTML.

Project Work

- **OrderTrack System (2023):** Designed and developed an order tracking and management system using Node.js and Express, enhancing operational efficiency. Integrated real-time order updates and optimized task allocation to streamline workflows.
- **Distributed Data Management System (2024):** Developed a central server with Python Flask to collect, verify, and manage data from multiple admin desk apps across locations. Designed admin and staff modules to facilitate data collection, verification, and improve operational efficiency. Packaged the application for deployment using PyInstaller for seamless distribution.
- **OCR Automation Tool (2024):** Created an OCR-based application to extract text from documents, ID cards, and passports using Python, Flask, JavaScript, EasyOCR, PyTesseract, and PassportEye. Implemented a database integration to securely store extracted data for further processing.

Education

Diploma in Computer Science & Engineering

Aug 2016- Jul 2019

Relevant Coursework: Object Oriented Programming, Database Management System, Data Structure, Computer Networks, Web Development.
