SUMMARY

Motivated Full-Stack Developer with 1.3+ years of experience, primarily working with Laravel in a full-time role at Anjali Computers, Gwalior. Proficient in building and maintaining ERP systems with strong command over both frontend and backend development. Skilled in HTML, CSS, JavaScript, MySQL, and familiar with frameworks like React. Experienced in creating RESTful APIs, working on complex reports, and contributing to software testing. Known for quick learning, clean coding practices, and the ability to adapt to new technologies and real-world project requirements.

WORK EXPERIENCE

FULL-Time Full-Stack Developer (Laravel) | Anjali Computers, Gwalior
<https://www.anjalicomputers.com/>

Feb 2024- present
WFH

- Working full-time as a Full-Stack Developer at Anjali Computers while pursuing MCA. Over the last 1.3 years, I have gained hands-on experience in building real-time business applications, improving development speed, and working on complex reports and APIs. I also assist in software testing whenever required, ensuring better code quality and performance.

PROJECTS

Currently Ongoing Projects

SmartTrade – Customizable Business Management Software

Currently working on SmartTrade, a highly customizable business management software designed to cater to a wide range of users — from small shopkeepers to large-scale factory operators. The system offers modular features such as billing, inventory, GST configuration, and more, which can be enabled or disabled based on the specific needs of each client. The flexibility and scalability of the platform make it suitable for diverse business environments, offering a personalized and efficient user experience.

Technologies Used: Laravel (Backend), HTML, CSS, JavaScript, and external UI libraries (Frontend)

Projects Worked On

Tyre Inventory Management System <https://tyres.anjalicomputers.com/>

- Developed a system to manage tyre inventory across multiple warehouses.
- Implemented automated reorder processes and stock level monitoring.
- Utilized Laravel, MySQL, and Bootstrap for backend and UI development.

SOCIAL WELFARE WEBSITE <https://c-vam1608.github.io/MISSIONNEEDYPEOPLE/>

- Spearheaded the creation of a support initiative that provided essential resources, including educational materials and aid packages, to over 1,000 individuals facing economic hardships, increasing community engagement by 40%.

Shoe Manufacturing Industry Order Management System

<https://order.anjalicomputers.com/>

- Developing an order management system to streamline order processing and inventory management.
- Features include order tracking, production scheduling, and third-party API integrations.
- Utilized Laravel for backend development.

Vansawali – Dynamic Family Tree Management System

<https://vanshawali.anjalicomputers.com/>

- Built a dynamic and interactive web-based application to digitally represent generational family structures. The system allows users to create, visualize, and manage family trees with support for multi-generational relationships. Implemented a tree-like structure where users can view each member's details along with photos, supporting both horizontal and vertical lineage growth. The intuitive interface and graphical representation provide a clear and user-friendly experience for understanding ancestral relationships.
- Technologies Used: Laravel (Backend), HTML, CSS, JavaScript, and external UI libraries (Frontend)

Arogyadham Chikistalay Evam Anusandhan Kendra – Static Website Development

<https://arogya.anjalicomputers.com/index.html>

- Developed a static informational website for Arogyadham Chikistalay Evam Anusandhan Kendra, a hospital based in Gwalior. The website was designed to provide essential information such as hospital services, doctor availability, contact details, and location map. Ensured a clean and responsive layout using HTML, CSS, and JavaScript to enhance user accessibility across all devices.
- Technologies Used: HTML, CSS, JavaScript
