

Purvi Agrawal

Software Developer

• +91-8687205001 • purviagrawal987@gmail.com

Dedicated professional with 4 years of comprehensive experience in Angular Framework and Object-Oriented Programming Languages, seeking a challenging role to contribute effectively to organizational goals while advancing my career. Proficient in application assessment, development, deployment, and maintenance, with extensive expertise in front-end technologies like Angular, HTML5, CSS3, and Bootstrap 5 to build responsive web applications. Experienced in developing and testing RESTful APIs using Postman and SwaggerUI, with a strong focus on delivering quality through meticulous documentation and reporting across all project stages. Known for quickly mastering emerging technologies and collaborating with teams to ensure optimal functionality and performance in products. Ready to leverage my 4 years of expertise to transform challenges into opportunities for growth and success.

Experience

AUG 2023 – MAY 2024

SOFTWARE DEVELOPER | TATA CONSULTANCY SERVICES LIMITED | NEW DELHI, INDIA

Project: HSBC

- HSBC (TCS-Bancs) covers under BFSI domain
- It is used by retail and corporate banks
- It is a highly parameterized and modularized core banking solution with simple and user-friendly design

Responsibilities:

- My responsibilities encompassed product maintenance, where I played a pivotal role in creating new features for the existing product
- I conducted detailed requirement analyses, offering technical training and functional insights to new team members
- Additionally, I contributed to automation testing and collaborated closely with the Database team

JAN 2022 – JUN 2023

SOFTWARE DEVELOPER | WEATHER RISK MANAGEMENT SERVICES PVT. LTD | GURGAON, INDIA

Project: Securisk

- Securisk is a web-based policy management system
- It covers the process of creating, maintaining and enforcing policies
- It works for unpredictable circumstances such as excess rainfall, deficit rainfall, cyclone, high and low temperature parameters

Project: Secutrack

- Secutrack is a web-based tracking application
- The whole application is working by using latitude and longitude with Google map

Responsibilities:

- Led front-end development, API integration, deployment workflows, and conducted Angular and product-specific training for new team members.
- I was focused on creating dynamic, responsive, and modular angular applications.
- Developed reactive data tables with pagination using structural directives, enabling real-time row updates based on user interactions.

- Implemented attribute directives for transitions and Angular pipes (e.g., Currency Pipe, Date Pipe, Title Case Pipe) to format displayed data.
- Designed advanced filtering features using textboxes, checklists, and radio buttons to refine results.
- Utilized ngx-toastr for user notifications and ngx-spinner for loading indicators.
- Optimized application performance by modularizing features and implementing role-based module loading.
- Built dashboards for summarized data and an admin panel for backend operations.
- Integrated real-time vehicle tracking with map visualizations using latitude and longitude.

DEC 2020 – NOV 2021

SOFTWARE DEVELOPER | ORANGESKILL TECHNOLOGIES PVT. LTD | KANPUR, INDIA

Project: Estate

- Estate management software system is an intelligent web-based management system
- Admin and client both panels are available
- It enables to effectively manage property portfolios across different locations and underpins a centralized management approach
- It handles details for rent and sale of property from clients

Project: Tech99

- Technical99 is a tutorial web application which provides tutorials and interview questions of various technologies

Responsibilities:

- Delivered front-end development, API integrations, and seamless deployment processes while crafting user-friendly interfaces and conducting thorough requirement analysis to ensure targeted development.
- Built reactive and template-driven forms with two-way data binding, supporting features like image upload/preview, date pickers, dropdowns, and field validation on submission.
- Implemented confirmation modals for delete actions and developed an admin panel for onboarding and managing users.
- Created login and signup modules with password validation and authentication using bearer tokens, incorporating AuthGuard for security.
- Leveraged ngx-owl-carousel-o for carousel functionality and utilized property decorators (@Input/@Output) for parent-child data communication.

Internships

Software Trainee | SECOND WORLD SOLUTIONS | Kanpur, India

- Worked upon a project titled 'ONLINE VOTING MANAGEMENT SYSTEM'
- Accomplishments/Skills acquired during internship: Designed live Website, Published website using CPANEL, Research and development, Critical Thinking

Skills

ANGULARJS • ANGULAR 13+ • ANGULAR 17+ • HTML5 • CSS3 • BOOTSTRAP 5 • REST API • TYPESCRIPT • JAVA • C • C# • .NET CORE • MVC • ENTITY FRAMEWORK • ADO .NET • SPRING BOOT 3 • SQL • ORACLE10G • SOFTWARE VERSION CONTROL • GIT • BITBUCKET • VISUAL STUDIO CODE • ECLIPSE • SWAGGERUI • POSTMAN • NETBEANS • JSP & SERVLET • PUTTY/WINSCP • FRONT END SOFTWARE DEVELOPMENT • WINDOWS • AGILE METHODOLOGY • DECISION MAKING • COMMUNICATION • QUICK LEARNER AND MULTI-TASKING • PROBLEM-SOLVING • TEAMWORK AND COLLABORATION

Education

2020

Master of Computer Application | University Institute of Engineering and Technology | Kanpur, India

2017

Bachelor of Science | CSJM University | Kanpur, India

2014

HSC | ST. John I C | Kanpur, India

2012

SSC | ST. John I C | Kanpur, India
