## Skills

- Programming & Scripting Languages:**

Basic knowledge of **Java** for test automation scripting; proficient in **HTML** and **CSS** for web development and UI validation.

Motivated and detail-oriented **QA Tester** with **2 years of experience** in **manual testing** and **low-code/no-code automation testing** using **Functionize Architect** . Skilled in verifying application functionality through manual test case execution and exploratory testing. Experienced in building automated test flows using Architect without the need for extensive coding. Possess **basic knowledge of Java** , **BDD using Cucumber** , and **API testing with Postman** , enabling effective collaboration with automation teams and enhancing test coverage. Adept at identifying bugs, maintaining detailed documentation, and working within **Agile/Scrum** environments to ensure high-quality software delivery

## Work History

2023-03 -  
Current

### Test Analyst

*Functionize Software Pvt Ltd, Noida (Remote)*

- Reviewed all test cases and test scripts for quality and identified additional areas to review.
- Reduced production issues by implementing rigorous regression testing before each release.
- Optimized test cases to maximize success of manual software testing.
- Facilitated quick issue resolution through clear defect reporting, providing precise steps to reproduce along with relevant screenshots or logs when needed.

2022-01 -  
2023-02

### Manual Tester

*Techconfer Technologies Pvt Ltd, Noida (Remote)*

- Improved software quality by meticulously executing manual test cases and identifying defects.
- Executed test scripts, logged defects and worked to resolve issues noted in testing process.
- Worked extended hours when necessary to meet deadlines.
- Collaborated with development team to diagnose and resolve software issues in a timely manner.

## Education

2019-03

### Bachelor of Commerce

- **Automation Frameworks & Tools:**  
Hands-on experience with **Functionize Architect** for automated web testing; basic understanding of **BDD using Cucumber** for writing behavior-driven test scenarios.
- **Manual & Test Management:**  
Strong skills in **manual testing**, including test case creation, execution, and defect reporting. Proficient in using **JIRA** for test management, bug tracking, and reporting.
- **Web Technologies:**  
Proficient in front-end technologies including **HTML** and **CSS**, with a focus on validating UI elements and front-end behavior during testing.
- **Methodologies:**  
Knowledge of **Agile** methodologies, with understanding of **SDLC** and **STLC** processes to ensure quality throughout the development lifecycle.

Dezlearn [CUCUMBER BDD AUTOMATION TESTER]

## Project

- **Project 1: E-Shop Web Application**
- **Role:** Manual QA Tester
- **Tools/Technologies:** Manual Testing, JIRA, Excel
- **Description:**  
Performed comprehensive manual testing for an e-commerce web application designed to replicate a real-world online shopping experience.
- **Responsibilities:**
- Designed and executed detailed test cases for modules including login, product catalog, shopping cart, and checkout.
- Conducted **functional, regression, and UI testing** across multiple browsers for consistent performance.
- Identified, documented, and tracked defects using **JIRA**, ensuring timely resolution.
- Collaborated with developers and business analysts during sprint reviews to align on requirements and deliverables.
- Ensured high-quality product delivery through extensive test coverage and detailed reporting.
- **Project 2: PayPal Web Application**
- **Role:** QA Automation Tester
- **Tools/Technologies:** Java, Cucumber (BDD), Selenium (if used), Postman, JIRA
- **Description:**  
Worked on an automation project simulating a

payment gateway integration, with a focus on validating secure transactions and backend API interactions.

- **Responsibilities:**

- Developed and maintained **BDD test scenarios** using **Java** and **Cucumber** to automate key user flows.
- Executed **positive and negative testing** for functionalities such as user login, payment processing, and error handling.
- Used **Postman** to validate API responses related to transaction status and authentication.
- Participated in Agile ceremonies including daily stand-ups and sprint planning for continuous integration of QA processes.
- Ensured application reliability and compliance with both functional and non-functional requirements.
