

PROFILE

Electronics and Communication Engineering graduate with strong programming fundamentals and a passion for software development. Skilled in data structures, algorithms, and building responsive applications. Completed multiple academic and personal projects. Eager to contribute and grow in a dynamic tech environment.

EDUCATION

NIT ANDHRA PRADESH B.Tech in Electronics and Communication Engineering – CGPA: 7.11/10	Tadepalligudem, India Aug 2021 - May 2025
--	---

SKILLS

Programming: Python, JavaScript, TypeScript

Web Technologies: React.js, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, Redis

DevOps: Docker, Kubernetes, Git, Jenkins, AWS

Software Engineering: Data Structures, Algorithms, , Microservices, REST APIs

EXPERIENCE

Full Stack Developer Intern – FrontEnd50 (Remote) Developed 3+ full-stack applications using MERN stack, handling 1000+ concurrent users with 99.8% uptime. Built and optimized 15+ RESTful APIs with Node.js/Express, reducing response time by 60% (500ms→200ms). Implemented database schemas for PostgreSQL/MongoDB, optimizing queries and improving data retrieval by 40%.	Jun 2024 – Aug 2024
---	--------------------------------

PROJECTS

Jarvis-AI Master: Developed an AI-driven content generation platform that accelerates content creation by up to 10x. Integrated advanced ML models and intuitive UI/UX for AI-based image generation and writing assistance. Received 98% positive user feedback during beta testing for performance, accuracy, and ease of use. Lets-Play: Built a real-time streaming platform featuring RTMP/WHIP ingestion, streamer dashboards, and interactive live chat. Enhanced engagement by 65% through follower-only/slow chat modes and responsive collapsible UI layouts. Implemented a scalable backend with React.js API Routes, PostgreSQL, and Prisma ORM, achieving 99.5% uptime on Vercel. Improved query performance by 45% through efficient database indexing and query optimization. Predicting Stocks with ML: Developed a real-time stock market forecasting tool using advanced deep learning techniques such as LSTM (Long Short-Term Memory) and GRU models. Trained on historical time-series data to predict future trends and assist in decision-making. Integrated with Streamlit for an interactive dashboard, visualizing predicted vs actual trends. Achieved high accuracy in short-term trend predictions with robust model evaluation metrics.	GitHub
--	-------------------

AWARDS AND HONORS

LeetCode Achiever: Completed 700+ days Problem of the Day streak and ranked in top 7 in campus-wide coding leaderboard. 7th Rank – Inter-College Coding Contest: Ranked top 10 among 400+ students in an external competitive programming challenge.

CERTIFICATIONS

HackerRank Programming – FreeCodeCamp Web Development – Udemy Courses	
---	--

COURSES

Database Management Systems Jul 2023 - Sep 2023	IIT Kharagpur
Business Analytics & Text Mining with Python Jul 2024 - Sep 2024	IIT Roorkee

LEADERSHIP & ACTIVITIES

Technical Lead – Developer Community, NIT Andhra Pradesh Mentored 20+ developers, led technical sessions and peer-learning initiatives	Sep 2023 – Apr 2024
Co-Secretary – Coding Club, NIT Andhra Pradesh Organized 10+ workshops with 300+ attendees, promoted coding culture across campus	Sep 2023 – Apr 2024
