Work Exnerience:

Unicode Systems

July 2024 – Feb 2025

Project: eCare a Hospital Management System

Description: eCare streamlines healthcare operations and enhances patient care through several Key modules: Front Desk, OPD, IPD, OT, Emergency ICU (CCU, NICU, PICU, BICU), Laboratory, Housekeeping, Dietitian, HR, Administration, Insurance, File Tracker, etc.

Role and Responsibilities:

- ✓ Managed projects as the primary liaison between clients and internal teams, effectively clarifying objectives and ensuring adherence to standards and deadlines.
- ✓ Implemented Agile methodologies and wireframing in project management to conduct comprehensive business intelligence analysis.
- ✓ Facilitated in-depth requirement-gathering sessions with stakeholders, translating complex business needs into precise technical specifications, including BRD, FRD, SRS, and WBS.
- ✓ Actively participated in daily Scrum meetings, sprint planning, and retrospectives, ensuring effective communication and alignment between the development team and stakeholders.

Webkul Software Pvt. Ltd

Aug 2021 – Mar 2024

Project: eCommerce Projects on OpenSource Framework (Magento, WooCommerce, CS-Cart, Open-cart)

Description:

- ✓ eCommerce shipping app for Grab, which works as a partner and provides shipping services integrated with Google Maps API by applying delivery charges.
- ✓ A booking and reservation mobile app where you can book an appointment with a doctor or make a reservation for your hotel and event bookings.

Role and Responsibilities:

- ✓ Creating different UML diagrams, flow charts, wire-framing, and more with Draw.io software.
- ✓ Managing client tickets with their requirement on JIRA, Confluence, and ERP Odoo Software, issues, and queries related to our open-source e-commerce products. Also responsible for project management, Requirement gathering, creating BRD, FRD, SRS, and SOW docs, wireframing, user stories, and testcase creation with UAT testing.
- ✓ Analyzing the client's needs, gathering all the information, and giving them the required solutions.

Ubitech Solutions Pvt. Ltd

Oct 2018 -Aug 2021

Product: Ubi Attendance & UbiHRM

Description: The Ubi Attendance app offers the surest way to track employees' Time and attendance. The HRMS App is a single-stop solution for managing all Human Resource functions.

Role and Responsibilities:

- ✓ Responsible for managing client calls, handling issues, selling products, and giving online demos.
- ✓ Assess the needs of our customers and gather user feedback to improve upon existing solutions and design and iterate sales processes and operations. Also, analyzing the business to determine mistakes and developing new strategies to improve performance.
