Skills

- Java
- Front-end (HTML)
- CSS

Languages

- English
(Trainee)
- Telugu
(Expert)

Professional Summary

- Proficient in Java, enabling me to tackle complex backend tasks efficiently and contribute to the development of robust applications.
- Skilled in Front-end technologies including HTML and CSS, facilitating the creation of visually appealing and responsive user interfaces.
- Quick learner with a solid foundation in computer science principles, ready to adapt to new technologies and frameworks.
- Strong analytical and problem-solving skills, capable of addressing and resolving challenges in software development projects.
- Effective communicator, able to articulate technical solutions clearly to team members and stakeholders.
- Detail-oriented, ensuring all aspects of software development meet high-quality standards and user requirements.
- Team player, able to collaborate effectively with coworkers to achieve project goals and contribute to a positive working environment.
- Highly motivated to continue professional development and stay abreast of new technologies in the IT and software engineering fields.
- Adept at multi-tasking and managing priorities in fast-paced, deadline-driven environments.
- Well-versed in the principles of software engineering, ready to apply best practices in software design, development, and testing.

Education

- Godavari institution of engineering technology - 2023**
Graduation/Diploma - Computer science and engineering
CGPA - 7.5

Industry

- Information Technology (IT) & Services, Software & SaaS**
Software Engineer/Developer
