

MD Arman

Khankhan455360@gmail.com

7458839431

Gorakhpur, Uttar Pradesh

Career Objective:

Motivated B.Tech Computer Science and Engineering student with a strong foundation in software development, data structures, and algorithms. Seeking an entry-level position to leverage my technical skills, problem-solving abilities, and enthusiasm for innovative technologies to contribute effectively to a dynamic team and drive impactful projects.

Education:

Course	Branch/Subject	Institute/University	Percentage/CGPA of Marks	Year of Passing
B.Tech	Computer Science & Engineering	Buddha Institute of Technology	7.5 CGPA till 6 th semester	2025
12 th	PCM	Purvanchal Public School	54%	2021
10 th	Science	Purvanchal Public School	62.2%	2019

Technical Skills:

- **Programming Language:** Python, C
- **RDBMS:** My SQL
- **Data Visualization:** Pandas, Numpy, Matplotlib, Seaborn
- **Operating System:** Windows

Project Undergoing:

- **Title:** RescueReady
Duration: 12 Months
Team Size: 4
Project Outline: To create a personal safety mobile application providing immediate emergency assistance, the RescueReady App features a "Danger Button" that alerts nearby users, shares real-time location via SMS, starts automatic camera recording, and activates a continuous buzzer until the location link is accessed. These features work together seamlessly to ensure that users can quickly signal for help and receive timely assistance in dangerous situations, enhancing personal security and peace of mind.
Role/Responsibility: I am developing and designing the backend for the "ReadyRescue" app. My responsibilities include building a scalable and secure infrastructure that supports the app's critical features, ensuring smooth data handling and reliable performance in real-time emergency situations.
Technology : Java, Python, and My SQL

Project Undergone:

1. **Title:** Heart Disease Prediction using Exploratory Data Analysis (EDA)
Time Duration: 1 Month
Team Size: 1
Project Outline: Conducted an exploratory data analysis (EDA) project on heart disease prediction using Python, with extensive use of Pandas, NumPy, Matplotlib, and Seaborn. The project involved analyzing various health indicators, visualizing patterns and correlations, and identifying key risk factors to enhance predictive modeling and insights into heart disease trends.
Technology : Python
2. **Title:** House Price Prediction using Exploratory Data Analysis (EDA)
Time Duration: 1 Month
Team Size: 1

Project Outline: The goal of this project is to perform an in-depth exploratory data analysis (EDA) on a house price dataset. EDA will help uncover relationships between house prices and other features, identify trends, spot anomalies, and prepare the data for further modeling.

Technology : Python

3. **Title:** Homely Vision– Customized Home Design Solutions

Time Duration: 2 Months

Team Size: 4

Project Outline: Developed a user-centric platform that allows users to input their land area and receive customized home designs. The platform provides detailed architectural plans, including the number of floors, rooms, and pricing estimates tailored to the specific area.

Technology : HTML , CSS , JavaScript

4. **Title:** Online Banking System in c

Time Duration: 1 Month

Team Size: 3

Project Outline: Developed a comprehensive online banking system that enables customers to manage their bank accounts and transactions securely. The system includes features for user registration, login, account management, and transaction handling.

Technology : C Programming

Training / Certification:

1. **Data Science with Machine Learning:**

Sofcon Scortek Pvt Ltd. (June 8, 2024 - July 8, 2024)

Seminar / Workshop:

- Attended a workshop on **Machine Learning and Its Application** by Dr. Dheeraj D at Buddha Institute of Technology from 13 March 2024 to 15 March 2024.
- Attended a workshop on **Data Science** with ShapeMySkills at Buddha Institute of Technology from 3 December 2022 to 4 December 2022.

Award / Achievements:

- Participated in **Smart India Hackathon (SIH) 2023**.
- Competed in **TechYuva**, the annual tech fest at Buddha Institute of Technology.
- I secured **first place** in the **Python coding** competition organized by Buddha Institute of Technology.
- I secured **second place** in the **TechYuva** competition, organized by Buddha Institute of Technology, for my project on an online banking system developed in C.

Personal Information:

- **Father's Name:** Mr. Salauddin
- **Mother's Name:** Mrs. Nagibun Nisha
- **D.O.B:** OCT 26, 2004
- **Gender:** Male
- **Marital status:** Unmarried
- **Language Known:** English, Hindi
- **Hobbies:** Listening to songs and visiting new places.
