

SUGANDH KUMAR

ksugandh0@gmail.com / +91 9140774908 / Gomati Nagar, Lucknow 226010 UP

Summary

A dynamic engineer driven by a passion for problem-solving and equipped with strong organizational skills. Proficient in AWS Cloud and DevOps tools, with a dedication to staying abreast of emerging technologies. Known for effectively resolving complex issues and continuously seeking opportunities for professional growth and innovation.

Experience

DevOps Engineer

Laitkor • Lucknow, UTTAR PRADESH

06/2024 - Present

- Containerize applications using Docker and deploy them on AWS, managing infrastructure and scaling as needed.
- Configure and monitor Windows Server environments, including SSL certificates, DNS settings, and other server-related tasks.
- Oversee the development, deployment, and maintenance of Node.js, PHP, Python based applications, ensuring optimal performance and scalability.
- Administer and maintain SMTP servers for reliable email communication, including configuration and troubleshooting.
- Oversee the setup, configuration, and management of Odoo ERP systems, ensuring they meet organizational needs and function correctly.
- Set up and maintain Apache and Nginx web servers, configuring them as reverse proxies to optimize application delivery and performance.
- Install, configure, and manage software packages and dependencies required for project development and deployment.
- Handle the deployment and maintenance of Python applications, ensuring smooth integration with existing systems.
- Address and resolve client issues via email, providing timely and effective solutions.
- Work closely with development teams to align on project requirements, troubleshoot issues, and implement solutions.
- Administrator and maintenance of Windows Server services and scheduled tasks.
- Monitoring and managing Linux and windows server using nagios alerts.

DevOps Engineer

Jamtech Technologies Pvt. Ltd. • Lucknow, UTTAR PRADESH

08/2023 - 06/2024

- Orchestrated CI and CD pipelines utilizing GitHub Action, ensuring seamless continuous integration and delivery of PHP Laravel-based applications.
- Provided high level of technical support, alleviating issues and finding solutions to problems.
- Performed server hardening activities such as applying security patches, configuring firewalls.
- Established a centralized local server environment (LAMP, LEMP, MERN, WAMP, XAMPP, etc.) for specific vhost usage by developers, streamlining development workflows and accommodating a variety of technology stacks.
- Contributed to the creation of a DevOps culture within the organization, leading to increased agility and cross-functional collaboration.
- Built automation tools and applications to deploy next-generation platforms.
- Mitigated security risks by conducting regular vulnerability assessments and applying necessary patches.
- Documented project design for reference and future use cases.
- Enhanced application performance by optimizing infrastructure configurations based on usage patterns.
- Streamlined code deployment processes through the automation of workflows with CI/CD pipelines, boosting development efficiency and speed.

Cloud Engineer

Cedcross Technologies Pvt. Ltd. • Lucknow, UP

04/2022 - 08/2023

- Managed servers on the Amazon Web Services (AWS) platform, including EC2 instances, ensuring optimal performance and scalability.
- Orchestrated the setup and management of various AWS services such as GitHub, ECR, Cloud Map, Load Balancer, Network Load Balancer, S3, and ECS Faraget cluster for PHP and Nginx-based containers using AWS CodePipeline.
- Implemented blue-green deployment strategies for microservices.
- Maintained Docker-based environments on developers' local systems, ensuring consistency and efficiency in software development workflows.
- Configured mailing servers using AWS Simple Email Service (SES), ensuring reliable email delivery for various applications.
- Monitored server performance using tools like New Relic and AWS CloudWatch, proactively identifying and addressing any issues to maintain uptime and performance.
- Dockerized applications according to client specifications, specializing in Magento 2, WordPress, and Laravel
- Dockerized applications according to client specifications, specializing in Magento 2, WordPress, and Laravel, PrestaShop.
- Responsible for the setup and maintenance of EC2 servers, including managing DNS, SSL certificates using Certbot, and utilizing AWS ACM for enhanced security.
- Migrated existing data and applications for convenient storage within cloud systems.
- Designed and maintained a secure VPC network architecture with both public and private subnets, ensuring data integrity and network security.
- Provided technical support to developers, resolving deployment challenges and optimizing cloud resource utilization for improved efficiency.

Trainee DevOps Engineer

The Entrepreneur Network Pvt Ltd • Delhi, Delhi

09/2021 - 03/2022

- Completed structured training modules on Docker, covering containerization fundamentals, Dockerfile creation, and image management.
- Participated in hands-on exercises to deploy and manage containers in Docker environments.
- Engaged in a comprehensive seven-step training program on Linux system administration, starting with basic commands and progressing to advanced topics like networking and shell scripting.
- Explored Git version control through a series of interactive tutorials, learning branching strategies, merging, and collaborating with remote repositories.
- Delved into Ansible automation with step-by-step modules, mastering playbook creation, inventory management, and task automation.
- Completed AWS cloud training sessions, covering core services like EC2, S3, and IAM, along with best practices for cloud deployment and management.
- Integrated learned skills into real-world scenarios through practical labs and projects, solidifying understanding and proficiency in DevOps tools and methodologies.

Skills

AWS: EC2, S3, IAM, AWS Developer Tools, AWS Developer Tools, ECS, VPC, SessioManager, Certificate Manager, , Route 53, SNS, SES, Route 53, SNS, SES, Containerization: Kubernetes, AWS ECS, Faragte, EKS, CircleCI , AWS CodePipeline, GitHub Actions, OS: Linux (CentOS, Ubuntu), macOS, Windows, Web Hosting: WHM cPanel, CloudWays, DigitalOcean, Database Management: MySQL, AWS RDS, Postgres, Mongo, Elastic Load Balancers, HAproxy, Web Server Stacks: LAMP, LEMP, MERN, Node, Email Services: Zimbra, AWS SES, Godaddy SMTP, Project Documentation, Performance Optimization, , Configuration Management

Education

Bachelor Of Computer Application
