PROJECT

★ E-commerce Website

Made Of **HTML, CSS, JAVASCRIPT And BOOTSTRAP**

★ React.js Weather App

Project Description:

The React.js Weather App is a web application that allows users to check the current weather conditions and forecast for a specific location. The app provides a user-friendly interface that dynamically updates information based on the user's input.

Technical Details:

1. **Front-end Framework:** The project will be built using React.js, a popular JavaScript library for building user interfaces.
2. **Weather API:** The app will integrate with a reliable weather API, such as fetch real-time weather data for the given locations.
3. **Styling:** Styling will be done using CSS, and additional libraries like Bootstrap or Material-UI can be incorporated for a polished UI.
