OBJECTIVE

I am an MCA student focused on development, known for my diligence, hard work, and dedication in all that I do. I am eager to learn and take every opportunity to gain knowledge and hands-on experience. My career aspiration is to secure a role in a dynamic, competitive environment where I can continuously challenge myself, push my boundaries, and deepen my expertise in computer science, all while contributing meaningfully to the company's success.

SKILLS

Programming Languages	C, C++, Java, PHP, Python
Frontend Technologies	HTML5, CSS3, Bootstrap
Database	SQL , phpMyAdmin
Version Control System	Git, GitHub

EDUCATION

Master of Computer Application (MCA)
Khwaja Moinuddin Chishti Language University Aug 2023 – June 2025
Bachelor of Computer Application (BCA)
Khwaja Moinuddin Chishti Language University Aug 2020 – July 2023
Intermediate (PCM)
St. Dominic Savio College July 2019
High School
St. Dominic Savio College May 2017

EXPERIENCE

Software Development Engineer Intern (Remote) Bluestock Fintech	Dec 2024 - Jan 2025
• Led a 10-member team in developing and optimizing Invest.io, a fintech platform, collaborating closely with Bluestock Fintech's leadership in a startup-driven environment. • Directed key projects, conducted 5+ team meetings weekly, and ensured the on-time delivery of milestones while operating in a remote and flexible setting. • Gained hands-on experience in managing software development processes and designing fintech applications, ensuring 98% bug-free deployment.	
Intern - IT Development Constech Projects	June 2024 – Nov 2024
• Successfully completed a 6-month internship in IT Development. • Assisted in IT development tasks for construction project management, supporting team collaboration and system maintenance. • Developed a UI for managing tools, which improved work efficiency by 40% and reduced errors by 20%. • Participated in team discussions, gaining insights into IT processes and project workflows.	

PROJECTS

Tourism Management System

- Technologies: HTML, CSS, JavaScript, PHP, phpMyAdmin
- Designed a responsive web application for booking and managing 100+ user accounts, with a secure authentication system ensuring 95% user access accuracy.
- Created an intuitive admin panel for managing 50+ bookings, improving administrative efficiency by 30% through easy access to data and tools.
- Deployed the frontend on Netlify, achieving 99% uptime and ensuring optimal user experience.

Project: LangSwap – AI-Based Language Translation System

- Tech Stack: Python (Flask), HTML, CSS, JavaScript, and MySQL
- Developed a multi-lingual language translation system for audio-to-audio, audio-to-text, and text-to-text translations in over 10 languages. Used `speech_recognition`, `gTTS`, and `deep_translator`.
- Implemented one-time password (OTP)-based user authentication for registration and login to secure access.
- Built the front-end in HTML, CSS, and JavaScript for a responsive interactive interface that features a theme toggle, animations, and feedback functions.
- Wrangled over 1,500 lines of Python code interfacing with translation APIs and threading for concurrent operations.

POSITIONS OF RESPONSIBILITY

- **Class Representative:** Represented **60+ students**, ensuring effective communication with faculty.
- **Teaching Assistant:** Mentored **40+ peers** in **C/C++, Java, and Python** programming.
- **Event Coordinator:** Managed logistics for **10+ academic and cultural events**, including workshops and contests.
