PROFESSIONAL SUMMARY

Motivated and detail-oriented **Laravel Developer** with hands-on experience in developing and maintaining dynamic web applications. Skilled in **PHP, Laravel, MySQL, JavaScript, React, and CRM systems**. Strong understanding of **backend logic, APIs, cron jobs, and automation workflows**. Passionate about optimizing performance, writing clean code, and collaborating in team environments.

EXPERIENCE

GrowUpNext – Laravel Developer

Feb 2025 – Present / Kanpur, Uttar Pradesh

- Working on enhancing and maintaining large-scale Laravel-based CRM applications.
- Developed and optimized backend modules for data processing, reporting, and automation.
- Created and scheduled **cron jobs** for daily data sync and automated NDR reports.
- Integrated REST APIs and improved existing CRM workflows for call handling and reporting.
- Collaborated with the QA team to debug, test, and deploy new features in production.

V3i Technologies – Web Developer Intern

Aug 2023 – Sep 2024 / Kanpur, Uttar Pradesh

- Designed and developed responsive front-end components using HTML, CSS, Bootstrap, and JavaScript.
- Assisted in building small-scale applications and form validation systems.
- Implemented best practices for SEO and cross-browser compatibility.
- Collaborated with design and backend teams for integrated development.

PROJECTS

NDR Management System

Laravel, MySQL, AJAX, CSV, PHP

- Built a complete **Non-Delivery Report (NDR)** system for managing courier and client records.
- Implemented features like **CSV upload/export, live filtering, date-wise export, and analytics**.
- Used AJAX and jQuery for live search, pagination, and asynchronous data updates.
- Improved system performance by optimizing queries and managing large data sets.

Abandoned Call Management System (CRM Module)

Laravel, MySQL, AJAX, API Integration

- Developed CRM features for tracking **abandoned calls, call recordings, and retry attempts**.
- Integrated APIs to fetch and display call data dynamically using modal popups via AJAX.
- Implemented secure file download of audio recordings through Laravel's HTTP client.
- Designed dashboards and reports showing call summaries, durations, and lead statuses.

Corn Job Automation Scripts

Laravel, PHP CLI, Task Scheduling

- Built and managed multiple **cron jobs** to automate lead updates, file imports, and exports.
- Automated database cleanup and daily reports to improve efficiency and reduce manual effort.

CRM Enhancement and Integration

- Enhanced CRM features by integrating external APIs and automating customer follow-ups.
- Worked on modules involving **lead tracking, disposition handling, and team performance reports**.

TECHNICAL SKILLS

Frontend:	HTML, CSS, JavaScript, Bootstrap, React JS
Backend:	PHP, Laravel (MVC), MySQL, REST APIs
Tools & Platforms:	Git, GitHub, VS Code, AWS (Basics), Excel
Automation & Jobs:	Laravel Scheduler, Cron Jobs, Data Scripts
Others:	CRMs, API Integrations, AJAX, jQuery

EDUCATION

Bachelor of Arts (B.A.) – CSJMU University, Kanpur

2019 – 2021

HIGHLIGHTS

- Developed automated cron jobs, API integrations, and real-time call management systems.
- Strong understanding of MVC architecture, Eloquent ORM, and database optimization.
- Proven ability to troubleshoot complex backend issues and deliver efficient solutions.
