SUMMARY

I'm a Passionate Web Developer with a strong background in both Front-End and Back-End Technologies. I specialize in building Dynamic, user friendly web applications using tools like Core PHP & MySQL. I thrive in collaborative environments where I can continue to grow and contribute to innovative solutions.

With Experience in Agile Development and working with REST APIs, I've Developed a wide array of skills that allow me to tackle various technical challenges. My goal is to deliver seamless, high-performance applications that enhance the user experience and drive business success.

PROJECTS

FingerPrint Master

07/2024 - 09/2024 Khair, Aligarh

<https://fingerprintmaster.in>

Fingerprint Master is a leading manufacturer and supplier of forensic equipment in India, known for its high-quality products and exceptional service. With a diverse range of over 200 products, the company caters to the needs of forensic professionals

- Develop and maintain the front-end of the website using HTML, CSS, JavaScript, and frameworks like Bootstrap for a responsive and dynamic user interface.
- Ensure that the website functions seamlessly across different browsers and devices.
- Optimize web pages for speed and efficiency, ensuring fast load times and smooth user experience.
- Collaborate with designers to improve the overall user experience and implement features that enhance usability.
- Ensure that the website functions seamlessly across different browsers and devices.
- Write efficient, clean, and scalable code using PHP frameworks such as CodeIgniter.
- Set up and maintain server environments C-panel and ensure efficient performance.

Real estate

07/2024 - 11/2024 Khair, Aligarh

<https://m3msales.co.in/>

M3M Group has been very successful in its operations and has continued to revolutionize the real estate sector. Even this transition has been affected by the M3M Owner, who has always focused on quality, new ideas and customer satisfaction. They have taken M3M India to uncharted success levels, which has benefited the company.

- Develop a user-friendly interface where users can search, filter, and view property listings. Utilize HTML, CSS, JavaScript, and possibly frameworks like for a responsive design.
- Ensure the website is mobile-friendly, adapting to different screen sizes, as many users will browse properties on mobile devices.
- Ensure the website works flawlessly across multiple browsers and devices.
- Implement lazy loading, image optimization, and pagination for better performance, especially on pages with a lot of listings and high-quality images.
- Develop functionality for adding, editing, and deleting property listings. Integrate with databases to store and retrieve property details, images, and other relevant information.
- Implement secure user authentication (login/register) for buyers, sellers, and agents. Assign roles with varying levels of access and permissions.
- Design and manage relational databases MySQL to store property information, user data, transaction histories, and more.
