Quality Checking – Business Development

EXECUTIVE SUMMARY

Excellent capability to explore, learn and understand newer business domain and technologies. I've expertise Java, Database, Php, Graphic Designing, and Web Development also. But I have deeply understood and excel in Core Java, Advance Java like: Java (Swing), Java 8(Functional Programming), Servlet/JSP, Maven. And good understanding about DSA, Collection Frameworks, Version Control Systems, and knowledge about JUnit Testing.

PROJECTS

Java (Swing) System Software: (Full Stack)

- It's a school management app where you get two panels one User/Admin.
- In User Panel we can submit student details and staff details like their fees, salary, and many more.
- Other side Admin panel is for the admin who have access to read or write student or staff details from anywhere because it's totally online application.

Java Web Application: (Full Stack)

- It's an online web application using Java full stack development.
- The project is based on "Online Shop" similar to amazon etc.
- In this I have used MySQL for data base and Apache Tomcat server these technologies are used for back-end development. Also used Http Request & Response Interfaces for servers.
- And for front-end development I've used Html, CSS, JS, Bootstrap.

PHP Web Application:

QR -Generator: It was my college mini project where we can generate our custom Quick Response Code. Also, there is a feature to add your different types of QR and read online.

Gaming Tournament Portal: Basically, it is a game organizing portal where we can create and manage gaming events it is similar to LMS (Learning Management System) portals where admin can create and organize events for any specific games.

ACADEMIC BACKGROUND

B-Tech/BE in Computer Science & Engineering | 2023

Integral University

Diploma in Computer Science & Engineering | 2020

Integral University

High School | 2017

Shibli Nursary High School
