Projects

Hate Speech Detection Using Machine Learning

Mar 2023-Jun 2023

- Worked on application that is useful for detecting Hate Speech.
- It was my College Final Year Project, It is Flask based project which is used to detect Hate Words. In this project I worked on Flask, Python, HTML, CSS and Machine Learning Supervised Algorithm.

Rahul's Portfolio

Personal Project

- I developed a responsive personal portfolio website. In this, I used modern design utilizing Bootstrap for responsive layout. Implemented dynamic content using JavaScript. Build the backend with Python and framework Django. Integrated a PostgreSQL database to store and retrieve data.

GUI Fantasy Cricket Game

Aug 2021-Oct 2021

- Worked on online game where I create virtual team of real cricket players and score points depending on how your chosen players perform in real life matches. Here I used Python, PyQt library and GUI.

Virtual Internships/ Trainings

DUCAT | Python Full Stack Developer

27 Feb 2024 - Present | On-Site

INTERNSHALA | Programming With Python

Oct 2021 | Remote

- Introduction to Python, Using Variables in Python, Basics of programming in Python
- Principles of Object – Oriented Programming (OOP), Developing a GUI with PyQt, Applications of Python in various Disciplines

ACCENTURE | Developer Job Simulation

Dec 2023 | Remote

Participated in the open-access Accenture Internship on Forage.

- Reading & Understanding Code, SDLC, Unit Testing, Shaping the Problem
- Infrastructure to Cloud, Attention to details

TATA | Data Visualization

Oct 2023 | Remote

Participated in Data Visualization: Empowering Business with Effective Insights Job Simulation.

- Complete a simulation involving creating data visualizations for TCS, created visuals for data analysis to help executives with effective decision making.

Certifications

- Communication by TCSION
- Machine Learning & Data Science in Python by Cognitive Class
- Introduction to Digital Transformation with Google Cloud
- Digitals Skills MOBILE & AI by Future Learn
