EXPERIENCE

Frontend Developer Intern — Blox Technologies

October 2024 – Feb 2025

Remote

- Built and optimized responsive UI components for the Blox employee portal using React.js, ensuring smooth user experience across devices.
- Integrated RESTful APIs to enable dynamic content rendering and real-time interaction across the portal.
- Developed key features like thread posting, poll creation, and pagination, improving platform engagement and usability.
- Maintained a clean, modular codebase with organized folder structure, focusing on scalability and developer-friendly practices.

SDE Intern — (Nearz)TechWits IT Solutions

Feb,2025 - present

Remote

- Revamped the existing Nearz website using React.js, modernized the UI/UX, and deployed it on Netlify for improved performance and maintainability.
- Built a new B2B SaaS platform for salon owners from scratch using React.js, enabling streamlined appointment and salon management
- Built an interactive appointment scheduling system using react-big-calendar with drag-and-drop support, enabling event creation, modification, and real-time confirmation.
- Implemented secure JWT-based authentication and integrated features like appointment management and a dynamic analytics dashboard for salon performance insights.
- Implemented secure JWT-based authentication and built key platform features like appointment lifecycle management and a real-time analytics dashboard showing salon insights such as daily bookings, sales trends, service-wise revenue, and customer flow.

PERSONAL PROJECTS

SpoonRocket | *JavaScript, React, TailwindCSS*

- Built a scalable front-end app using Swiggy's live API for real-time data, following modern web standards.
- Implemented efficient "Add to Cart" functionality with Redux, improving state management and user experience.
- Integrated dynamic API endpoints for real-time restaurant menu and cart updates, enhancing operational accuracy.

Subscription and Expense Manager | *Java (Spring Boot), React, MySQL/MongoDB*

- Built a full-stack application using Spring Boot, React, and MySQL/MongoDB to help users track and manage recurring subscriptions and expenses..
- Designed a user-friendly dashboard showcasing monthly spend, upcoming renewals, and trends to improve financial awareness.
- Implemented automated email reminders for upcoming renewals using scheduled jobs, reducing missed or late payments.
- Integrated secure user authentication and protected data storage to ensure the privacy of sensitive subscription information
