## SUMMARY

Results-driven Software Test Engineer with 2+ years of experience in Manual and Automation Testing, ensuring 99% defect-free software delivery. Proven expertise in test planning, execution, automation scripting, and defect tracking, leading to a 30% reduction in testing time through automation. Skilled in performing functional, regression, integration, UI, and API testing, with 90% test case coverage for critical applications. Proficient in Selenium WebDriver, TestNG, JUnit, Postman, and Rest Assured, with hands-on experience in CI/CD pipelines using Jenkins and Git, improving test execution efficiency by 40%.

## WORK EXPERIENCE (2+ Years)

### Test Engineer- Quality Kiosk Technologies Private Limited

March 2023 -Current

#### ▪ Roles and Responsibilities

- ✓ Analyze business requirements, functional specifications, and technical documents to understand testing scope.
- ✓ Expert in functional, regression, integration, system, and user acceptance testing (UAT), achieving 95% test coverage for critical applications.
- ✓ Developed and executed 300+ automated test scripts using Selenium WebDriver, TestNG, reducing regression testing effort by 50%.
- ✓ Hands-on experience with API testing using Postman, Rest Assured, and Karate, leading to a 25% improvement in API reliability.
- ✓ Debug test scripts, analyze failures, and report defects using bug-tracking tools.
- ✓ Monitored application performance using Dynatrace, optimizing infrastructure and digital experience efficiency by 40%. Additionally, utilized Datadog to monitor mobile applications and backend services, ensuring real-time issue detection.
- ✓ Strong expertise in defect tracking and debugging, reporting 200+ defects in JIRA, with a 98% resolution rate. Collaborative in Agile environments, actively participating in 50+ sprint cycles, enhancing testing processes by 20%.

#### ▪ Core Competencies & Achievements:

- ✓ Manual Testing – Executed 500+ test cases, ensuring 95% functional coverage
- ✓ Automation Testing – Developed and maintained 300+ Selenium test scripts, reducing regression effort by 50%.

## SKILLS

### ❖ Technical Knowledge

Manual and Automation Testing, TestNG Framework, Oracle SQL, Core JAVA, Selenium with java, Performance Testing, Maven

### ❖ Key Skill

Test Case Design & Execution, Bug Tracking & Reporting, Functional & Regression Testing, Exploratory Testing, Cross-Browser & Cross-Device Testing, Test Documentation, Usability & User Acceptance Testing (UAT), Strong Communication & Collaboration.

## EDUCATION

- |                                                          |             |
|----------------------------------------------------------|-------------|
| • Mumbai University                                      | 2019 - 2022 |
| Bachelor of Science - Information Technology - 8.75 CGPI |             |
| • RKT College of science and Commerce                    | 2017 - 2019 |
| HSC Maharashtra Board, Science - 50%                     |             |
| • CDA Academy                                            | 2016 - 2017 |
| SSC CBSE Board - 9 CGPA                                  |             |

## LICENSES & CERTIFICATIONS

- Software Development in Test (SDET) from Seed Infotech, Thane, Mumbai Maharashtra, India
- Manual Software Testing- Udemy
- Selenium WebDriver with java- Udemy
- Dynatrace Masterclass- Udemy
