SUMMARY

Results-driven Software Engineer with a robust academic background in Data Science and Information Technology. Skilled in leveraging analytics and machine learning to solve intricate problems. Seeking to apply expertise as a Software Engineer and Data Analyst, driving innovative solutions and thriving in collaborative, high impact environments.

EDUCATION

Master of Technology in Data Science – 8.5 CGPA (*current*) : 2022-2024
Manipal University Jaipur

Bachelor of Technology in Information Technology – 6.81 CGPA : 2016-2020/21
Manipal University Jaipur

Intermediate from Lucknow Public School, : 2014-2016
Lucknow

CERTIFICATIONS

- AWS Solution Architect (pursuing) : 2023
- Data Driven Decision with Power BI | Coursera : 2023
- IBM Data Science Professional Specialization | Coursera : 2023
- Neural Networks and Deep Learning : 2023

WORK EXPERIENCE

Zansys Technology : Jan 2021 – July 2021
Web Developer Trainee

- Actively contributed to the enhancement of client websites by implementing various features to improve user experience and functionality. My key responsibilities and achievements included: requirement gathering, documentation, feature development and automating part of the company's lead generation process.

National Informatics Center (NIC) : Jan 2020 – May 2020
Junior Web Developer

- Conceptualized and executed a full-stack project, making a prototype Web Portal for the Legal Metrology UP department using Laravel. Leveraged the department's existing Core PHP portal as a starting point to explore the migration potential to the Laravel framework.

HackDev Technologies : June 2019 – July 2019
Cyber Security Intern

- Learned about various cyber-attacks and their implementations on a target machine, Network Scanning, OSINT and Penetration Testing.

Freelance Web Development

- Developed a dynamic website in Core PHP for a dental clinic in my hometown.

PROJECTS

Credit Card Fraud Detection using R.

- Built a classifier in R that can detect credit card fraudulent transactions using variety of ML algorithms.

Web Scraper in Python

- Created a robust web scraping project in Python using BeautifulSoup to extract and save job listings from various job portals. Integrated this data with a decision-maker finder script that utilizes snov.io's API to identify key contacts within those companies.

Dummy Social Media Site Database

- Built a database for Instagram-like websites using MySQL.

SKILLS

Technical Skills

- Data Visualization (PowerBI)
- Recommender Systems
- Machine Learning
- Big Data
- Programming Languages:
 - Python, R, PHP, C, C++
 - SQL, Postgres SQL
 - Scikit-learn, pandas, numpy

Soft Skills

- Communication
- Critical thinking
- Research
- Collaboration
- Time management
