OBJECTIVE

Aspiring software developer with a passion for cutting-edge technology and problem-solving. I'm seeking an opportunity in an innovative organisation where I can learn, adapt to evolving industry trends, and contribute to impactful, scalable solutions while advancing my career.

EDUCATION

Meerut Institute of Engineering & Technology

(Master of Computer Application)

Meerut, Uttar Pradesh

Sep. 2023 – Aug 2025

Allahabad State University

(Bachelor of Science)

Prayagraj, Uttar Pradesh

Aug. 2019 – Sep 2022

PROJECTS

❖ Bank Management System ATM Simulator System [[Link](#)]

Built a GUI-based ATM simulation system that replicates real-world banking operations such as withdrawals, deposits, and balance checks. Designed to deliver a seamless and interactive banking experience with a secure backend database.

- Implemented authentication, transaction management, and balance verification using MySQL.
- Applied OOP concepts like abstraction and encapsulation for a modular code structure.
- Enhanced database interaction and GUI responsiveness using Java Swing & AWT.

❖ Shopdressup.com Clone [[Link](#)]

Developed a full-stack e-commerce website for clothing and accessories that provides users with a smooth and visually appealing shopping experience. Designed with modern front-end technologies to ensure mobile responsiveness and fast performance.

- Created reusable ReactJS components for product display, filters, and navigation.
- Styled the UI with Tailwind CSS and DaisyUI for a clean and minimal aesthetic.
- Implemented dynamic product listing and responsive design for all screen sizes.

❖ Ticket Booking App [[Link](#)]

Designed and implemented a Java-based ticket reservation system capable of managing multiple ticket bookings, viewing, and cancellations through a user-friendly command-line interface. Demonstrates strong understanding of OOP principles and data management using Java Collections.

- Developed booking modules to handle passenger details, seat allocation, and ticket cancellation.
- Implemented data persistence through file handling for storing booking records.
- Ensured error-free operation using exception handling and input validation.

❖ Personal Expense Tracker [[Link](#)]

Developed a command-line (CLI) application to help users manage their daily expenses effectively. The system allows adding, updating, viewing, and deleting expense entries with persistent data storage in CSV format. Designed to improve financial tracking through a simple text-based interface.

- Integrated CSV-based data handling for storing and retrieving expense records efficiently.
- Implemented CRUD operations with input validation and error handling.

TECHNICAL SKILLS

Skills: Java, C, HTML, CSS, ReactJS, JavaScript, Bootstrap, SQL, MySQL, Spring Boot, REST API, Microservice, Docker, Kubernetes, Spring Cloud.

Developer Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Eclipse, Talend API Tester

STRENGTHS

- ❖ Able to meet deadlines and handle responsibilities.
- ❖ Ability to cope with failures and learn from my mistakes.
- ❖ Teamwork, Problem-Solving, Creativity, Initiative & Vision.

HOBBIES

- ❖ Chess, badminton and Photography
