Sales Performance Analytics & Interactive Dashboard | PostgreSQL, Power BI, Excel

- Designed and implemented a complete data analysis workflow using PostgreSQL for data cleaning, preprocessing, duplicate handling, and creation of calculated metrics such as sales, profit, orders, discounts, and revenue. Applied SQL queries for transformation and validation, then developed an interactive Power BI Sales Dashboard with advanced visualizations including scatter plots, maps, donut charts, stacked bar/column charts, cards, and slicers to deliver actionable insights and support data-driven decision-making.
