[github.com/Faizan7864](https://github.com/Faizan7864)

Enthusiastic and skilled Software Developer fresher with a strong academic background in computer science. Proficient in Java, and Python, C , and familiar with web development technologies. Eager and ready to leverage my passion for coding and dedication to deliver high-quality software solutions for a organization's Success.

## EDUCATION

### BTECH

Jul 2022 - Jul 2026

Maharana Pratap Engineering College

GPA: 7.0

- Currently pursuing **B.Tech in Computer Science and Engineering** from **Maharana Pratap Engineering College**.
- Expected graduation year: [2026]
- Strong interest in **Software development, data analysis, and problem-solving**.
- Hands-on experience with academic and personal projects in web development, dashboards, and management systems.
- Good understanding of core CS concepts: OOP, DBMS, OS, and Data Structures.
- Comfortable working with tools like **VS Code, GitHub, MySQL, and Excel**.
- Strong communication skills and ability to collaborate in team-based environments.
- Open to internships, freelance work, and part-time opportunities in tech.

## WORK EXPERIENCE

### React JS Intern

May 2025 - Present

#### Celebal Tecnologies Summer Internship 2025 (CSI 2025)

India

- Implemented **component-based architecture** and utilized **React Hooks** (useState, useEffect) to manage state and side effects.
- Integrated **RESTful APIs** for data fetching and real-time updates in the frontend application.
- Collaborated in an agile environment with team members using **Git, GitHub, and Scrum methodologies**.
- Ensured code quality and reusability by following **industry-standard coding practices** and applying **modular design** principles.
- Enhanced application performance through **optimization techniques** like code-splitting and lazy loading.
- Gained exposure to modern **JavaScript (ES6+), Axios, and React Router** for SPA navigation.

### SUBJECT-MATTER EXPERT

Jul 2024 - Present

#### Chegg India

Kanpur, Uttar Pradesh, India

- Provided detailed, step-by-step solutions to complex physics problems for global students.
- Ensured accuracy, clarity, and conceptual understanding in all submitted answers.
- Specialized in topics such as mechanics, electromagnetism, thermodynamics, quantum physics, and modern physics.
- Met daily/weekly targets for solution contributions while maintaining high quality and student feedback scores.
- Reviewed and corrected peers' solutions to maintain content accuracy and quality standards.
- Developed concise and educational explanations to help students grasp fundamental concepts.

## SKILLS

**Programming Languages:** |Java | Python| C | JavaScript |NoSQL| SQL|

**Visualization Tools:** Power-BI | Tableau | MS - Excel

**CS Fundamentals::** |Data Structures | Algorithms | OOPS | Microservices|

**Cloud:** AWS | Azure | GCP

**Soft Skills :** Leadership Skills | Creative thinking Skills |

## PROJECTS

### PlanPoint - Project Management Web App

Apr 2025 - Jun 2025

- Developed **PlanPoint**, a web-based project management application to streamline task tracking and team collaboration.
- Implemented features like **task creation, assignment, deadlines, and project progress visualization**.
- Built **user authentication** and **role-based access control** for secure multi-user functionality.
- Integrated a **Kanban board UI** for intuitive drag-and-drop task management.
- I Used **React js, Express, MongoDB**, for full-stack development.
- Designed a **responsive and user-friendly interface** to ensure accessibility across devices.

### Blockchain Based Pension Management System

Jan 2025 - Mar 2025

- Developed a decentralized platform to automate and secure pension fund management using blockchain.
- Created smart contracts to manage pension eligibility, disbursement, and beneficiary details.
- Integrated Web3.js for seamless frontend interaction with Ethereum blockchain.
- Conducted testing on the Ropsten testnet to validate contract functionality and ensure secure transactions.
- Focused on preventing fraud, enhancing transparency, and minimizing manual intervention.

### Car-Bike-Rentals-Application

Jun 2024 - Aug 2024

- I Developed a full-stack vehicle rental platform using **React, Firebase, and Redux** for seamless user experience.
- Implemented **responsive UI** with **React Bootstrap** and **SASS**, ensuring optimal performance across all device sizes.
- Enabled secure **user authentication** and **real-time data handling** with **Firebase Authentication** and **Firestore**.

- Utilized **React Redux** and **React Persist** for efficient global state management and data persistence.
- Built intuitive **client and server-side routing** using **React Router v6** for smooth navigation.
- Integrated **Firebase Storage** for file management, including user document and vehicle image uploads.
- Enhanced user interaction with **SweetAlert2** for elegant alerts and confirmation dialogs.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                     |
