## SUMMARY

A CCM Developer with 3 years of experience specializes in designing and implementing customer communication management (CCM) solutions using tools like OpenText Exstream and SmartCOMM. They excel in creating personalized multi-channel communications, managing document lifecycles, and ensuring seamless integration of various output formats. Their role includes performance tuning, quality assurance, and collaborating with cross-functional teams to enhance the accuracy, efficiency, and overall quality of customer communications.

---

## WORK EXPERIENCE

### Senior Systems Associate | Infosys Limited | Insurance Domain

Dec 2024 - Present

- Designed and developed static and interactive letter templates for an insurance-related client to ensure clear and effective communication.
- Implemented variable mapping and updated rules and logic to personalize and enhance the accuracy of communication.
- Conducted thorough postman testing to verify the functionality and performance of communication templates.
- Identified and resolved defects promptly to maintain the quality and reliability of the final output.
- Delivered end-to-end results to the insurance-related client, ensuring timely and effective communication solutions.
- Collaborated with cross-functional teams to improve processes and enhance overall project efficiency and accuracy.

### Infosys Internal Project API Testing

- Implemented API testing using Postman, utilizing a provided API link to validate various functionalities and endpoints.
  - Developed a Requirements Traceability Matrix (RTM) to ensure test cases align with project requirements, and updated an Excel sheet with test results, clearly indicating pass or fail status for each test case.
- 

## EDUCATION & CERTIFICATION

### Bachelor of Computer Application

Chhatrapati Shahu Ji Maharaj University, Kanpur

- Dr. Virendra Swarup Institute Of Computer Studies

Jul 2018 - Jul 2021

- **AWS Cloud Practitioner Essentials**
- **GitHub Foundations Certified**

## TECHNICAL SKILLS

- **Languages** : C,C++,HTML& Java
- **Database Management**: MySQL, PostgreSQL.
- **Tools** Selenium Automation Tool, Postman, Opentext Exstream,SMARTCOMM.
- **Cloud Platform**: AWS(Services like EC2, RDS, S3 )
- **Framework**: TestNG , Junit.
- **Version Control**: Git.
- **CI/CD**: Basics Knowledge of Jenkins.
-
