PROJECTS

Indiestreet

🔗 <https://indiestreet.shop>

- IndieStreet is a multi-vendor eCommerce MVP built using Next.js, Node.js, and MongoDB.
- Contributed to the frontend and handled the entire backend, optimizing performance and functionality.
- Successfully deployed the backend on AWS Lambda, ensuring scalability and efficiency.

De decore

- De Decore is a service provider platform where users can buy products or request services.
- Developed the entire backend using Node.js, Express.js, PostgreSQL, Prisma ORM, and Vine.js for validation.
- Worked on this project during my internship, gaining hands-on experience in backend development and database management.

Simlinks

🔗 <https://simlinks.vercel.app/>

- SimLinks is a full-stack application built with Next.js, featuring authentication using NextAuth and a MongoDB database.
- It includes route protection functionalities, ensuring secure access to user-specific data.

EXPERIENCE

Backend Developer

Freelance

📅 06/2024 - Present

- Developed and delivered 4+ real-world projects as a freelance Backend Developer, including De Decore and IndieStreet.shop.
- Implemented and optimized complex backend functionalities, improving application performance and scalability.
- Gained hands-on experience in solving challenging problems efficiently while ensuring smooth project delivery.

Backend developer Intern

Red and white multimedia , Surat

📅 08/2024 - 01/2024

- Explored and implemented API caching, Socket.io and other backend optimizations in real-world projects.
- Selected as the only intern entrusted with real-time projects and received a stipend for contributions.
- Gained hands-on experience in scalable backend development while actively contributing to company projects.
