

YOGESHWAR SINGH CHAUHAN

Email: yogeshwaralliswell@gmail.com

Mobile: +91 9453237687

Experience: 12 Yrs

Education: Bachelor of Technology in Computer Science and Engineering

Professional Summary

- With **12 Years** of relevant experience in working on Microsoft dot net web-based applications.
- Worked in health care, e-governance, customer relationship management, re-insurance and education domain.
- Strong hold on Object oriented programming system and programming design patterns.
- Strong hold in technical skills like C#, ASP .NET Standards, MSSQL and source control management.
- Quick learning ability and taking challenging tasks and delivering them on time.

Work Experience

1. Current organization,

Company name: Ascendion Engineering Private Limited

Designation: Senior Software Engineer

Duration : 24th Dec 2021 to till date

2. Company Name : Growmor Strategic Management Private Limited

Designation : Senior Software Engineer

Duration: 1st Oct 2021 to 22nd Dec 2021

3. Company Name : ITC Infotech Private Limited

Designation : Associate Consultant

Duration: 21st Mar 2016 to 29th Dec 2017

4. Company Name : QA Infotech Private Limited

Designation : Associate Consultant

Duration: 07th Jan 2015 to 19th Jan 2016

5. Company Name : Expedien e solution,

Designation : Software Developer

Duration: 05th April 2012 to 06th Jan 2015

6. Company Name : Data Assests

Designation : Software Developer,

Duration: 25th Nov 2009 to 31st March 2012

Education

- **Bachelor of Technology** (Computer Science & Engineering) from Ajay Kumar Garg Engineering College, Ghaziabad in (2005-2009) **66.84%** aggregate marks (Affiliated to Uttar Pradesh Technical University, Lucknow).
- Completed **XII** from Army Public School, Lucknow in (2003-2004).
Aggregate: **64.20%** (Affiliated to C.B.S.E Board)

- Completed **X** from Army Public School, Lucknow in (2001-2002).
Aggregate: **77.20%** (Affiliated to C.B.S.E Board)
- Certification in **Computer Network Management** from **Indian Institute of Technology, Kharagpur** in **2008**.

Skills

- **Programming, Scripting and Markup Languages:** C# , JavaScript, HTML, CSS, JQuery
- **Web Development:** Asp.net core, MVC , Web API, Typescript, Angular 6+, React Js
- **Database Packages/ ORMs:** MS SQL server, ADO. Net, Entity framework, NHibernate, SQLite, Dataverse with XRM library
- **IDE:** Microsoft VS code , Visual Studio 2022 Professional (Latest worked on)
- **Source Control Management Tools:** VSS, SVN, TFS, VSTS, git
- **Scrum Tool:** Jira , Azure Devops
- **Web API debugging tools:** Postman, Fiddler, SOAP UI
- **CI/CD Tool:** JetBrains Team City and Octopus deploy, Azure Devops Pipeline, Jenkins
- **Logging Platform:** Nlog, Serilog , Log4Net , Splunk and Azure Application Insights
- **Unit Testing :** Xunit, Nunit
- **Project Architecture:** Monolithic, Microservices
- **Containerization tool :** Docker
- **Code Repository Tool :** Github, Gitlab, Azure Git Repo
- **Team/Business Communication Platform:** Microsoft Team, ZOOM meeting
- **Design Patterns:** Factory Pattern, Singleton Pattern, Repository Pattern, Façade Pattern
- **Azure Cloud Services :** Azure Blob Storage, Azure App Services, Azure VM, Azure application Insights

Projects

Project 1 # (Latest Project)

Role: Senior Software Engineer

Project Title: FiguratePax Automation Solution

Client /Domain : Cytiva (**Health Care Domain**)

Technologies : .Net Core 8 , Rockwell Automation Factory Talk LogixEcho API, Xunit Framework, C#, Azure git Repo, Azure Bastion, Azure Devops

Duration : 01 Nov 2024 to till date

Team Size: 11

Description: In Figurate Pax Automation Solution we have the programmable logic controllers used in Industrial automation which works on the ladder logic. Programmable logic controllers have different processes which contain different routines such as aborting , stopping , holding etc and to test these ladder logic we need to develop a .Net core automation testing solution using Xunit framework which will test all the processes used in Industrial automation.

JOB RESPONSIBILITIES:

- Attended daily meeting for project discussion using Microsoft Team tool.
- Worked on PBI's created on Azure Dev Ops.
- Worked on Source control management activities such as complete code merging, managing feature branches and managing and resolving code conflicts .
- Worked on writing the integration test cases using Xunit framework and Rockwell Automation Factory Talk LogixEcho API.

Project 2 #

Role : Senior Software Engineer

Project Title: FIJI CRM WEB API PROJECT

Client: HP FIJI (Customer Relationship Management)

Technologies : ASP. NET WEB API , DEV tool, XRM , DATAVERSE, MICROSOFT DYNAMICS 360

Duration : 15 FEB 2024 to 25 Oct 2024

Team Size: 15

Description: To develop the web API for the FIJI CRM portal which will handle all the backend process of creating, updating and deleting the Dataverse entity which is required for FIJI CRM portal functionality.

JOB RESPONSIBILITIES:

- Attended daily meeting for project discussion using Microsoft Team tool.
- Worked on PBI's created on Azure Dev Ops.
- Worked on Dataverse entity.
- Worked on creating web api using c# and .NET core and XRM SDK.
- Worked on writing XRM query expressions for complex business logic.
- Worked on writing web api controllers and actions for complex business logic.
- Worked on resolving bugs if any reported by testing team.
- Work on verification of functionality on dev and UAT env using sample data.

Project 3 #

Role : Senior Software Engineer

Project Title: Medicare Support Center

Client: CVS Health (Health Care Domain)

Technologies : WEB API , MS SQL, ASP .NET MVC , ASP. NET WEB API , DEV tool, Splunk log

Duration : 01 Nov 2022 to 31 Jan 2024

Team Size: 14

Description: Medical Support center at CVS is an educational and enrollment program owned and operated by CareFree Insurance Services, a subsidiary of CVS Health and licensed insurance company. This portal sells online medicare plans through arrangement with insurance companies, independent licensed agents, agencies and call centers staffed by Carefree agents, contractors and affiliated agencies.

JOB RESPONSIBILITIES:

- Attended weekly meeting for project discussion using Microsoft Team tool.
- Worked on MSC application development using C# and ASP.Net MVC framework.
- Worked on MSC database application operations.
- Worked on MSC code promotion to MSC repo using github and VS 2019 professional.
- Worked on Integrated accessibility framework for accessibility functionality in MSC application.
- Coordinated with QA team in resolving bugs and defects reported if any.
- Worked on POC projects like Microsoft BOT framework for MSC application.
- Worked on Sunfire WEB api endpoints used in MSC application.
- Worked on error logging functionality in MSC application .
- Worked on Error notification functionality in MSC application.
- Worked on Lookup and DataLookup operations of MSC application which were based on Database operations.

Project 4 #

Role : Senior Software Engineer

Project Title: Small Market Aetna Rating Tool (SMART) and EDT Tool

Client: CVS Health (Health Care Domain)

Technologies: WEB API, React Js, .Net Core 5.0, MSSQL, Microservices, Team City , Octopus

Duration: 24 Dec 2022 to 31 Oct 2022

Team Size: 10

Description: Small Market Aetna Rating Tool is a web based quoting tool designed to give brokers and general agents access to real-time business quoting. With this system, you can create new business quotes, send proposal to customers and access renewals for current customers.

JOB RESPONSIBILITIES:

- Attended daily meeting for project discussion using Microsoft Team tool.
- Worked on work item creation in JAZZ Team Server using Agile methodology.
- Worked on the development, unit testing and maintenance of .NET Core WEB APIs of SMART application.
- Worked on the development of SDLC load for loading, validation and migration process.
- Worked on dental rating engine webapi and handle the dental rating factor execution process.
- Worked on database queries used in dental rating engine system for dynamic rating.
- Worked on Smart Web application development using C# and .Net core framework.

Project 5#

Role : Senior Software Engineer

Project Title: Terminal Automation System (TAS)

Client: Yokogawa Technology Solutions India Pvt. Ltd.

Technologies: WEB API, Angular 6+, .Net Core 5.0, MSSQL

Duration: 2 months 11 Days

Team Size: 22

Description: Terminal automation software automates certain manual processes in a terminal, specifically around load authorization, product movement (via multiple transportation methods), product measurement, documentation, and reporting. The software is flexible and open to integration with other siloed systems and hardware, including meter skids, weight scales, tank gauging systems, and secure access control systems. These systems often bridge the gap between the Enterprise Resource Planning (ERP) and Supervisory Control and Data Acquisition (SCADA) systems.

JOB RESPONSIBILITIES:

- Attended daily meeting for project discussion using Microsoft Team tool.
- Worked on work item creation in azure Devops using Agile methodology.
- Worked on the development, unit testing and maintenance of .NET Core WEB APIs of Terminal automation system.
- Worked on the development, unit testing and maintenance of Angular Web project of TAS system.
- Worked on Azure Devops for code submission and integration.
- Worked on SonarQube for module testing and static analysis.

Project 6#

Role: Associate Consultant

Project Title: Aon Wrap Web Application

Client: Aon (Insurance Domain)

Technologies: Asp.Net 3.5 C#, SQL 2005, WEB API , Angular, SharePoint Timer jobs

Duration: 12 Month

Team Size: 140

Description: It is a project management solution for controlled insurance programs, in which details of the Client contacts, Contractor details, Contract and their respective policies are maintain. Using this application user can create various wrap levels and sub levels and under that respective contracts can be created. Overall this web application maintains the two UI's internal and external. Internal for the Aon staff user and external for the Contractors.

JOB RESPONSIBILITIES:

- Understand the Issue/Problem occur on Production which are reported on Service now portal as an Incident.
- Code reviews analysis and suggest the required solution to resolve the reported incident.
- Involved in application and development code changes.
- Involved in meeting Calls and understanding the problem/Issue occur in production.
- Involved in TFS item solution development using .NET based web application solution.

Project 7#

Role : Associate Consultant

Project Title: Processes & Tools improvement – INPT

Client: Airbus (ERP Domain)

Technologies: Asp.Net 3.5 C#, SQL 2005, Nhibernate, WEB API, Angular

Duration: 3 month

Team Size: 150

Description: As part of the ICT Team I was responsible for the improvement of new IT Tools & Processes for Manufacturing & Operational Airbus Aircraft Programmers.

JOB RESPONSIBILITIES:

- Understand the requirement (both functional and non-functional) by going through the specifications and with inputs from business analysts in order to understand the end user requirements.
- Analysis and developed the application part as per high level design in order to develop/validate/maintain the application as per the requirements.
- Involved in application and development code changes.
- Worked on bug reports fixing.

Project 8#

Title: Penn Foster Online Web Portal

Client: Penn Foster Distance Education in Scranton, Pennsylvania (Education Domain)

Application: Penn Foster Student Portal

Technologies: Asp.Net 4.0 C#, SQL 2012, MVC, WEB API , Angular

Duration: 12 Month

Team Size: 10

Description: Transformation of existing 3-Layered Penn Foster Web application to MVC framework application.

JOB RESPONSIBILITIES:

- Understand the requirement (both functional and non-functional) by going through the specifications and with inputs from business analysts in order to understand the end user requirements.
- Analysis and developed the application part as per high level design in order to develop/validate/maintain the application as per the requirements.
- Involved in developing web forms, reports, and dashboards.
- Worked on bug reports fixing.
- Handle US clients meeting through GOTO meeting applications.

Project 9#

Title: E- Governance Project

Client: Rajasthan University of Veterinary and Animal Sciences (Education Domain))

Application: On Screen Evaluation Management System

Technologies: Asp.Net 3.5 C#, SQL 2005, Crystal Report, ASP.NET WEB FORM

Duration: 18 month

Team Size: 4

Description: This web application help the University Examiners to evaluates the students answer copy online from any remote location. This application involves the student attendance marking process, barcode Generation, pasting barcodes on hard answer copies, cutting the hard Answer copies for scanning, Scanning the hard answer copies for uploading, uploading the soft answer

copies, examiner registration, examiner pool creation, examiner pool approval, moderator evaluator mapping, question configuration and template preparation, Answer copy allocation and manage user activation rights.

JOB RESPONSIBILITIES:

- Understand the requirement (both functional and non-functional) by going through the specifications and with inputs from business analysts in order to understand the end user requirements.
- Analysis and developed the application part as per high level design in order to develop/validate/maintain the application as per the requirements.
- Involved in developing web forms, reports, and dashboards.
- Worked on bug reports fixing.
- Visited the client site Rajuvas, Bikaner, Rajasthan for Implementation of complete application.
- Provided process training to the University employees.

Achievements: Got appreciation certificate from Controller of Examination on successfully implementation of application at Client site.

Project 10#

Title: E- Governance Project

Client: Assam Agricultural University (E- Governance Domain)

Application: Store and Purchase Management

Technologies: Asp.Net 3.5 C#, SQL 2005, Crystal Report

Duration: 12 month

Team Size: 4

Description: This web application helps the University employees to manage the stores at various locations. This application involves process such as indent creation, indent approval /rejection, Quotation/Tender Notice, Purchase order generation, PO approval/rejection, bill generation, stock transfer requisition, Item requisition.

JOB RESPONSIBILITIES:

- Understand the requirement (both functional and non functional) by going through the specifications and with inputs from business analysts in order to understand the end user requirements.
- Analysis and developed the application part as per high level design in order to develop/validate/maintain the application as per the requirements.
- Involved in developing web forms, reports, and dashboards.
- Worked on bug reports fixing.
- Visited the client site AAU Jorhat, Assam for Implementation of complete application.

Certification

- Certification in **Computer Network Management** from **Indian Institute of Technology, Kharagpur**, West Bengal, India.

Hobbies and Interest

- **Hobbies:** Net surfing, swimming, playing football.
- **Skills and strength:** Leadership, quick learner.

Personal Details

- **GENDER:** Male
- **NATIONALITY:** Indian
- **LANGUAGES SPOKEN:** English, Hindi

Declaration

The information provided by above is correct to the best of my knowledge.
