PROFILE SUMMARY

B.Tech Computer Science graduate with a passion for web development and AI. Experienced in MERN stack development with hands-on experience building responsive, efficient applications. I am eager to apply my problem-solving skills and technical expertise to build innovative, user-centric solutions while continuously learning and adapting to emerging technologies.

TECHNICAL SKILLS

Programming Languages: Java, Javascript

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, Responsive Web Design

Databases: MongoDB, MySQL

Technologies: RESTful APIs, Machine Learning (Basics), AI Tools

Tools: VS Code, Git, GitHub

WORK EXPERIENCE

Web Developer Intern

February 2025 – June 2025

Zager Digital Services

Durg, Chhattisgarh

- Worked on the development of the CSIT college website using the MERN stack, contributing to both frontend and backend components.
- Developed backend models and implemented authentication mechanisms using Node.js and Express.js.
- Integrated Cloudinary to manage and serve media content for the gallery section, enabling efficient image uploads and dynamic rendering.
- Maintained consistency with the Zager company website by reusing architecture patterns and UI design strategies.
- Collaborated with a team to ensure responsive frontend development and seamless backend integration.

Front End Development Intern

June 2023 – July 2023

Edunet Foundation under IBM SkillsBuild Program

- Engaged in front-end web development, focusing on enhancing user interfaces and optimizing website performance using modern web technologies like HTML, CSS, and JavaScript.
- Developed a Hotstar clone web app, applying modern web technologies to create a responsive and interactive user experience.

PROJECTS

CSIT College Website | *MongoDB, Express.js, React.js, Node.js, Cloudinary*

- Developed and deployed a full-stack college website (CSIT) during internship at Zager Digital Services.
- Created backend models and implemented user authentication with session/token-based login.
- Used Cloudinary to manage the college gallery section, enabling cloud-based image uploads, retrieval, and optimization.
- Worked on both backend and frontend to ensure consistency with company web standards and responsive design principles.

Plant Disease Detection Web Application | *Python, OpenCV, HTML, CSS, JavaScript, Flask*

- Collaborated on a group project to develop a website for detecting plant leaves and predicting plant species using a trained model.
- Developed a plant disease detection app with 0.92 mAP accuracy, leveraging the YOLO algorithm to identify 27 plant diseases, reducing false positives by 30% through iterative fine-tuning.
- Designed and executed a user-friendly GUI with drag-and-drop functionality, integrated with a PyTorch-trained model on 3000+ annotated images, reducing user input time by 50% and training time by 60% using CUDA optimization.

Quiz App | *HTML, CSS, JavaScript*

- Designed and developed an interactive quiz application using HTML, CSS, and JavaScript.
- Enhanced user engagement through dynamic content loading, real-time score updates, and user feedback mechanisms.
- Implemented timer functionality and progress tracking to improve the user experience.
