EDUCATION

- Institute of Engineering and Technology** Lucknow, India
Bachelor of Technology - Computer Science and Engineering, CGPA: 8.52 Aug 2020 - June 2024
- Saraswati Vidya Mandir** Lucknow, India
10 + 2 Equivalent(Science) , Percentage: 93.4 April 2018 - July 2020

SKILLS

Languages: C | C++ | Python | SQL | HTML | CSS | Javascript

Developer Tools: Sublime Text | Visual Studio Code | Git | Github | Postman

Frameworks: React | Node.js | Express.js | Bootstrap | MongoDB

Soft Skills: Cooperation | Organizing Ability | Leadership | Team Management

Coursework: Data Structures and Algorithm | Operating System | Computer Networks | Database Management System

EXPERIENCE

- iMocha** Maharashtra, India
Problem Setter May 2023 - July 2023
 - Creating Problems:** Creating Programming Questions on a vast range of DSA topics, and testing the problems.
 - Handling User Feedbacks:** Checking different user feedback, resolving them, and updating the live problems.

PROJECTS

- BitCode (Github)**
Coding Platform
 - Introduction:** Developing a coding platform with an intuitive user interface, that let users practice coding problems in different languages.
 - Collaboration:** Integrated version control systems, such as Git, to enable seamless collaboration among developers.
 - Features:** New User Registration, login, logout, conditional rendering of the profile page, and users can solve coding questions in different languages.
 - Tech Used:** HTML | CSS | Javascript | Bootstrap | React | Node.js | Express.js | MongoDB | API
- SmartLearner (Github) (View)**
Learning System
 - Introduction:** Smart Learner is a web application designed to aid users in revising and memorizing questions and their corresponding answers effectively. The platform employs a unique flip card approach, presenting questions on one side of the card and their respective answers on the other.
 - Usage:** Smart Learner's flip card-based approach enables users to memorize questions and answers in an engaging and efficient manner.
 - Tech Used:** HTML | CSS | Javascript | React | Bootstrap | Firebase
- Crypto Currency Tracker (Github) (View)**
Web Application
 - Introduction:** Created a web application that tells the market value of cryptocurrencies.
 - Usage:** Presents Market Capital, Volume, and Price of different cryptocurrencies.
 - Tech Used:** HTML | CSS | Javascript | React | API

ACHIEVEMENTS

- Ranked** 1082 among 15000+ participants in January Long 2022-I Division 3 (rated)
- Ranked** 1300 among 9000+ participants in January Cook-Off 2022 Division 3.
- Ranked** 22 in Coderush organized by **Algo University** at our college. ([Link](#))
- Solved over 1000+ problems of Data Structures and Algorithms on different coding platforms including **Codechef**, **Codeforces**, **LeetCode**, **Spoj**, **HackerRank**, **LeetCode** and others. ([Link](#)) ([Leetcode](#))
- Ranked** 3977 in **Google Kickstart** Round E 2022. ([Link](#))
