PROJECTS

SMS SPAM CLASSIFIER

Oct 2022 – Nov 2022

- **This is a SMS spam classification project. It takes input text from the user and tells whether the text/message is spam or not.**
- We used Jupyter Notebook to Execute all the libraries and some algorithms .
- It uses some useful libraries of python such as sklearn and nltk. and create a web page using Streamlit Library.
- And finally the model is deployed on Heroku.
