PROJECTS

- **Music Beats**—It is a Web app which is developed using Django framework. Its an advance music streaming website that allows user to add his/her favourite playlist and user can upload his/her personal songs in their particular channel.
- **Student Fee Management System**—The project was a desktop application which is build on Eclipse IDE where we have Accountant and Admin section . We insert student registration details and fee related information in Database and using that data in way to get better result .
- **ID-Card Generator**-The project was a desktop application which is build on Eclipse IDE where we insert student information in Database and fetching that data to create a student identity .
