EDUCATION

MCA

Shri Krishna University

10/2023 - 08/2025

Chhatarpur, India

BA

University of Allahabad

08/2019 - 08/2022

Prayagraj, India

WORK EXPERIENCE

Full-Stack Developer

LeanLearn(Project Dark Horse)

11/2024 - 12/2024

- Implemented **OTP-based authentication** through Twilio, significantly improving security measures and user trust.
- Implemented Authorisation using **Supabase & JWT**.
- Created a comprehensive **backend for the quiz feature**, facilitating efficient data handling and user interaction.
- Developed **APIs for Teachers and Students features** such as create quiz, edit quiz, get quiz, create questions, get question bank etc.

Research and Development Intern

Encrypta IN

10/2024 - 12/2024

- Developed an **event scheduler** feature for the workspace calendar.
- Resolved numerous calendar **bugs & issues**, ensuring a reliable workspace calendar and achieving noticeable improvements.
- Implemented the **template view** and the **mailer view** for App Mailing System.

Research Consultant

WorldQuant Brain

12/2022 - 07/2025

- Automated alpha simulations with **javascript**, achieving **over 90% reduction in testing time**, enabling rapid development of alphas.
- Integrated BRAIN APIs with NodeJS scripts for **automated alpha creation**, utilizing **MongoDB** as the data store.
- Mentored 20+ consultant to be a Research consultant.

ACHIEVEMENTS

WorldQuant

WorldQuant Awarded 24th place in ACE Competition among 1500+ researchers from 35+ countries. Developed an automated Python code to simulate over 10,000+ alphas and submit 500+ alphas.

PERSONAL PROJECTS

URL Shortener (07/2024 - 07/2024) 🔗

- Developed a URL Shortener application allowing users to **shorten long URLs** and seamlessly redirection to the original links.
- Implemented key features such as generation of unique short codes, **redirection Logic** and analytics.
- Created a frontend for the application using **React.js**.

Linux-commands (04/2024 - 05/2024) 🔗

- Created Linux command line utilities (**head**, **tail**, **wc**, **ls**) with options using Node.js.
- Implemented the **FS module** to efficiently manage file system operations.
- Employed **Yargs** to handle command-line options and arguments, enhancing usability and flexibility.

Social-media-app (06/2024 - 07/2024) 🔗

- Built the backend with **NodeJS** and the frontend with **React.js**.
- Implemented core functionalities including user profiles, friends, posts, feed, comments, and likes.
- Integrated **JWT** and **Bcrypt** for secure user authentication and authorization. Leveraged AWS S3 for efficient user profile image storage.
- Enhanced performance and scalability by implementing **Redis caching**, reducing database load for frequently accessed data.
- Scheduled daily digests and automated email notifications using **Cron jobs** and **Nodemailer**.
- Utilized **SQLite** with **Sequelize ORM** to manage database operations and ensure seamless data persistence.

Opinion Poll (09/2023 - 09/2023) 🔗

- Developed a comprehensive Opinion Poll application with **CRUD APIs** to gather and analyse user opinions on any topic.
- Implemented robust backend operations with **NodeJS** to handle user submissions, ensuring data integrity and security.

Rock-Paper-Scissors Game (05/2025 - 05/2025) 🔗

- Developed a user-friendly rock paper scissors game, enhancing player engagement through an intuitive interface using **React.js & Tailwind**.
- Implemented real-time game logic processing, ensuring seamless gameplay and reducing lag, which significantly improved user satisfaction.
- Implemented game **score logic** for streamlining score tracking and providing users scores.
