Experience

DIGIPANTS (Onsite), Lucknow, India | Junior Software Developer **Sep 2024 – Present**

- Led development of a hotel management and Astrology Booking system improving booking efficiency by 15%.
- Created a WhatsApp bot to automate room booking and enhance the customer booking experience
- Utilized Meta API to create automated WhatsApp interactions supporting structured messages, guided booking steps.
- Minimized website load time through image optimization, lazy loading, and CDN integration.
- Built responsive UIs using React, increasing user engagement by 10%.
- Implemented backend using Express.js and MongoDB, handling 200+ transactions daily.
- Applied code optimization techniques like JS/CSS/HTML minification to improve speed.

Analyze InfoTech (Onsite) | Software Developer Intern **Jul 2023 – Dec 2023**

- Built full product-data capture workflows for an e-commerce system with MongoDB.
- Designed optimized data models and APIs to enhance backend performance.
- Implemented JWT and bcrypt-based authentication with advanced error handling.
- Improved data integrity using Mongoose, serializers, and validation layers, increasing accuracy by 15%.

Skills Summary

Languages: TypeScript, JavaScript, Java, SQL

Frameworks: Next JS, Node.js, React.js, Express.js, MaterialUI, Tailwind CSS,

Developer Tools / Platforms: Git, GitHub, VS Code, Sublime Text, Project IDX

Databases / Cloud: MongoDB, PostgreSQL

Development Practices: SDLC, Agile, Version Control

Soft Skills: Leadership, Event Management, Public Speaking, Time Management

Projects

Pitch-Startup | TypeScript, NextJs, MongoDB, Sanity, JWT Live

- Built a startup-pitching platform that enables founders to share ideas, participate in pitch competitions, and engage with an interactive, real-time evaluation experience.
- Engineered a full-stack pitching platform using React.js, Express.js, MongoDB, and Tailwind CSS, ensuring fast performance and scalable routing.
- Integrated Firebase authentication for secure onboarding and synced user data across sessions with real-time updates.
- Implemented smooth navigation and consistent component design for optimized user experience across devices.

Learning Management System | Express.js, React.js, Node.js, MongoDB, Redux Toolkit Repo

- Developed a full-stack Learning Management System with React, Node.js, Express, and MongoDB backend.
- Enabled mentors to create courses and lectures using protected, token-based API endpoints.
- Integrated lecture management with title, video URL, duration, and free preview toggles.
- Implemented real-time updates for course ratings, enrollment count, and lecture tracking system.

Drop | MERN Stack

- Developed a scalable full-stack social media platform with core features such as posts, likes, comments, and user follow system, improving user interaction and retention.
- Implemented a highly responsive and optimized React.js frontend, resulting in a 30% improvement in component render efficiency and overall page responsiveness.
- Integrated Multi-Factor Authentication (MFA) using Google Authenticator to strengthen application security and ensure industry-grade login protection.
- Enhanced performance by applying code splitting, dynamic imports, and lazy loading, reducing initial bundle size and improving loading speed significantly.

Education

Dr. Abdul Kalam Technical University, Lucknow

Oct 2020 – Jul 2024

Bachelor of Technology (Computer Science and Engineering), CGPA: 7.8

Lucknow, India
