Portfolio: <https://faizan-port.netlify.app/>

Experienced React.js developer with one year of hands-on experience specializing in crafting dynamic and responsive user interfaces. Proficient in building high-performing web applications with a focus on efficiency and maintainability.

SKILLS

JavaScript, HTML, CSS, ReactJs, Redux, NodeJs, MongoDB, Bootstrap Material UI , API Integrations

PROFESSIONAL EXPERIENCE

React Developer - IPH Technologies Pvt. Ltd.

Dec 2022 - Present

- Engineered immersive user interfaces with React.js, guaranteeing intuitive navigation and heightened user engagement for web applications.
- Collaborated across teams to seamlessly integrate third-party APIs, broadening application functionality and elevating overall user satisfaction.
- Leveraged Redux for streamlined state management, enhancing data flow and noticeably boosting application performance.

React Developer - Mobiloitte Technologies Pvt. Ltd.

Oct 2022 - Dec 2022

- Demonstrated proficiency in creating dynamic and interactive user interfaces using React.js, ensuring seamless user experiences for web applications.
- Collaborated effectively with cross-functional teams, including UX/UI designers and back-end developers, to seamlessly integrate front-end and back-end functionalities.
- Developed a knack for identifying and resolving technical issues, showcasing adept troubleshooting skills to maintain smooth application functionality.

PROJECTS

IPH Technologies Website

- Utilized React.js to create a dynamic office UI website for IPH Technologies, showcasing expertise in front-end development.
- Created responsive components, interactive features, and real-time data integration.

Your Land Loans

- Conceptualized and developed a React.js-powered web platform to streamline loans and financial interactions, demonstrating proficiency in building user-friendly interfaces.
- Implemented separate authentication systems for lenders and borrowers.
- Integrated a secure payment gateway for smooth and safe loan transactions.
- Devised specific functionalities: lenders manage loans, while borrowers explore and apply for loans.

Billing Software

- Engineered a comprehensive billing software with a strong emphasis on user authentication, employing advanced development practices.
- Implemented a role-based action system, allowing users to define roles and assign permissions.
- Designed roles granting users the authority to create, edit, view, and remove specific bills based on their responsibilities.

Workflow

- Created a React.js-based web application named 'Workflow' featuring a robust file system for seamless file uploads and AI-generated answers, highlighting adept problem-solving skills.
- Integrated an interactive prompt library for AI-generated answers based on user questions and uploaded content.
- Included a data source management section to efficiently handle various data sources.

EDUCATION

Future Institute Of Engineering & Technologies, Bareilly

2018 - 2022

B.Tech Computer Science
