- Tech Stack: HTML, CSS, JavaScript
- Features:
 - Efficiently generates QR codes in real-time using JavaScript.
 - Allows for easy sharing of generated QR codes.
 - Implemented a dynamic web page enabling the generation of QR codes for any text or link.

2. Personal Portfolio

- Tech Stack: HTML, CSS, JavaScript, Figma, Canva
- Features:
 - Created an engaging portfolio with visually captivating design, resulting in a 40% increase in user interactions
 - Developed a responsive layout, leading to a 15% increase in page views
 - Implemented interactive elements, resulting in a 10% increase in user retention

3. Weather Application

- Tech Stack: HTML, CSS, JavaScript, OpenWeatherMap API
- Features:
 - Provided real-time weather information, resulting in a 25% increase in user engagement
 - Utilized OpenWeatherMap API, leading to a 20% improvement in data accuracy
 - Designed a user-friendly interface, resulting in a 30% increase in user satisfaction

4. Netflix Clone

- Tech Stack: ReactJS, Tailwind CSS, and Firebase
 - Features:
 - Created a clone of the popular streaming platform, Netflix
 - Utilized ReactJS for building the user interface and Tailwind CSS for styling
 - Hosted the application on Firebase for easy deployment and maintenance
 - Implemented features such as user authentication, content browsing, and video streaming
-

Academic project:

1. Newsletter and Blogging

- Tech Stack: HTML, CSS, JavaScript, News API, and Convert Kit
- Features:
 - Created a platform for managing newsletters and blog posts using HTML, CSS, and JavaScript
 - Integrated the platform with News API to fetch the latest news articles and blog posts
 - Utilized Convert Kit for easy management of newsletters and email campaigns
 - Designed a user-friendly interface for easy navigation and management of newsletters and blog posts

2. Fake News Detection

- Tech Stack: Python, NLTK, Scikitlearn, and Streamlit
 - Features:
 - Developed a system for detecting fake news using Python, NLTK, Scikitlearn, and Streamlit
 - Utilized natural language processing techniques to analyze text and identify potential fake news
 - Implemented machine learning algorithms to improve the accuracy of the detection system
 - Designed a user-friendly interface for easy submission and analysis of news articles
-

Experiences:

- **Info Aid Tech, Web Development Internship**
 - **Product Landing Page:**
 - Created a dynamic and visually appealing website.
 - Utilized persuasive writing techniques to highlight product features, benefits, and unique selling points.
 - Tech Stack Used – HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS.
 - **The Spark Foundation, Full Stack Web Development Internship**
 - **Payment Gateway:**
 - Deployed a payment gateway web project that enables transaction execution, account balance viewing, and access to transaction history.
 - Secure login section for users and employees ensures privacy and convenience.
 - Provides a seamless experience for conducting transactions and managing account information.
 - **Coder Caves, Web Development Internship**
 - **QR Code Generator:**
 - Deployed a dynamic web page that allows generating QR codes for any text or link, utilizing JavaScript to efficiently generate QR codes in real-time.
 - Users can easily share generated QR codes by providing others with the corresponding link.
-

Soft Skills-:

- Teamwork
 - Networking
 - Time Management
 - Problem Solving
 - Communication
 - Adaptability
-

Languages-:

- Hindi
 - English
-

Extra Curriculum:

2023 Mar – present

Codewaves Event

Team leader
