Linkedin: 🌐 www.linkedin.com/in/jay-yadav-164069266

Software Developer with hands-on experience in building scalable web applications, APIs, and backend logic using PHP, Laravel, ReactJS, and .NET. Demonstrates strong problem-solving skills, database optimization, and a commitment to delivering high-quality code in collaborative environments. Experienced in full-stack development and real-time systems.

Skills

● Programming Languages & Tools:

- Php
- Javascript
- ASP .NET
- HTML,CSS
- React
- Node js
- Express js
- MVC

Systems: Linux (Ubuntu).

Database: Mysql, sql.

Scripting And Automation: Python,

Version control: Git, GitHub

Experience

January 2025-present

ALOT DIGITAL SOLUTIONS | SOFTWARE DEVELOPER

Plugin Extension

- Developed an **OpenCart** product feature that sends WhatsApp notifications to users upon plugin installation.
- Developed a custom **Zapier plugin** to send automated WhatsApp messages based on trigger actions.
- Developed and maintained scalable applications using **.NET** and **Node.js**, ensuring robust performance and reliability.
- Designed and integrated **RESTful APIs**, performing thorough testing with **Postman** to ensure seamless functionality.
- Managed database operations using **MySQL** and **SQL Server**, optimizing queries for efficient data retrieval.
- Supported deployment processes and **server management** in **Linux environments**, enhancing system stability.

SAVVY BUSINESS SOLUTION | SOFTWARE DEVELOPER

Tax Advisor (Web Application):

Jan 2024– DECEMBER 2024

- Led the implementation of version upgrades across internal software platforms.
- Implemented API integration in a dynamic, user-interactive project.'
- Handled complex database projects with a focus on high-query performance and optimization.
- Worked alongside a passionate and motivated team to successfully execute project goals.

TALK CHAT(CHAT APPLICATION)

- Developed a real-time chat application using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- The application facilitates seamless communication between users with features such as persistent message storage, user authentication, and live updates powered by WebSocket technology.
- Real-Time Messaging: Implemented WebSocket (using Socket IO) for bidirectional communication, enabling instant delivery of messages without page refresh.

Education

Mumbai University

Bachelor of Science,
Information & Technology
(2020-23) CGPA: 9.2

Certification

core Java from (RST FORUM)
