EDUCATION

Bachelor of Computer Application | Dr CV Raman University | Thane, Mumbai | May 2023

MCA | JS University | Shikohabad | Uttar Pradesh | Pursuing

Projects

1. HRMS Software :- April 2024 – Present

Responsibilities: - Leading the HRMS software development project from its inception, responsible for overall direction and progress. Continuously working on the project, making improvements, adding features, and resolving issues as they arise. Meeting with managers to discuss and develop software logic, then implementing these solutions within the application. This project is currently ongoing, and I continue to lead the efforts to refine and enhance the software.

2. Confiance Marketing :- March 2024 – April 2024 (Company Website)

Responsibilities: - I have made admin panel of this website incorporating API integration to enhance functionality. This transformation allowed the website to shift from static to dynamic content management, enabling administrators to update and manage content directly through the admin panel. My role involved designing and implementing the logic for this system, ensuring seamless API integration, and making the user interface intuitive and efficient. This change not only improved the website's flexibility and responsiveness but also empowered the team to maintain and update the system easily.

3. Book2Travel :- Feb 2024 – March 2024 (Travelling Website)

Responsibilities: - Led the creation and integration of admin dashboard and menus for a dynamic flight booking website, enhancing user experience and data management efficiency. Introduced import/export features and PDF generation capabilities, contributing to streamlined operations. Involved from project inception to completion, and delivering impactful solutions.

4. Kisley (E-commerce)

Responsibilities: I led the development of a dynamic product management platform from start to finish. The primary focus was to provide users with a streamlined interface for adding and showcasing products with pricing details. My involvement ensured the successful delivery of a robust and user-friendly solution, poised to revolutionize product management processes.

Extra

Portfolio I have made my portfolio with admin panel and API integration. I have not used any static design to make my portfolio. This Portfolio is fully Dynamic and manageable from Admin Panel. I have used all features in this admin panel. Like -> Mail Sending, Excel Export, Bulk Import, Searching, Shorting, Pagination, Crud, API, MVC, Toastr, etc.
