PERSONAL SUMMARY

I'm a Tech Geek, working at Jio Platforms Limited as a **Junior Software Developer** working on **Backend Web Development**. I graduated with an **8.56 CGPA** in my **Bachelor of Technology** in Computer Science and Engineering from **SRM Institute of Science and Technology**. I like to gain knowledge and tinker around with various new technologies and devices that come to the market, love to become an early adopter of those in this fast-paced world. I like to support people in their tasks which help things to go smoothly, using my technical skills.

SKILLS

Languages

JavaScript, MySQL

Technologies/Frameworks/Tools

NodeJS, Express, MySQL, Git, Mocha-Chai, Azure, Postman, Kafka, APM, ELK, Swagger, Kubernetes, Microservices Architecture

EDUCATION

Bachelor of Technology - SRM Institute of Science and Technology - 8.56 - 2021

Key Modules - Software Development Life Cycle, Fundamentals of Cloud Computing, Computer Hardware, Basics of Networking,

AISSCE (12th) - Cathedral Senior Secondary School, PCMC, 79.8%, 2017

AISSE (10th) - Cathedral Senior Secondary School, 7.8, 2015

EXPERIENCE

Junior Software Developer (Deputy Manager) –Jio Platforms Limited – June 2021 to Feb 2023

- Working as a Backend Developer (NodeJS) and building REST APIs as well as writing testing them using Mocha-Chai testing framework for their Financial Credit Management Systems.
- Using MySQL databases for Data handling operations.
- Handling and delivering projects according to agile methodology in the given sprint timelines and suggesting inputs in project planning about timeline planning.

- Designing integrated solutions like Cron Jobs for scheduling APIs at some predefined time and data from sources like Kafka connect and MySQL Database.
- Publishing code using Azure DevOps and running through the setup pipelines.
- Suggesting optimizations and fixes for the pre-existing APIs for better handling and processing of the data in the APIs.
- Checking Kubernetes and Elastic APM (ELK) stack for live projects for bugs and issues and fixing them.
- Documenting and checking API's functionality using Swagger UI.
- Using Git to manage code and merge the existing codes by fixing the merge conflicts, code smells and vulnerabilities faced during code review.

Internship/Training- Wiley Mthree Service Desk Analyst Trainee – Feb 2021 to May 2021

- The training is for us to gain enough technical knowledge about a financial bank to work in it as a service desk analyst.
- I was trained in Financial Markets, Agile Methodologies, Linux, ITIL, SQL and Python.
- The training also gave us insights into how financial banks work and how technology is implemented inside them. And we were also given insights about the financial aspects of the institution.

Internship – Summer Trainee in Research Design and Standards Organisation - 2019

- The internship comprised of developing a Hospital management system's Frontend along with various modules in it for the railway hospitals.
- HTML, CSS, Bootstrap

Internship – Accenture (Virtual Internship)- 2020

- In this, I was working as an intern doing planning, communication and plan redesign on their project workflows of their clients.
- Microsoft Word, Microsoft Excel, Workflow Chart Maker.

Internship – Sales Intern at Zolo Stays- 2020

- In this, we were provide training on various business tools used in the the industry which we used for lead generation which was further used to get clients for the company.
- Facebook analytics, Leadsquared lead analysis, Ameyo calling Interface

Internship – Social Media Marketing Intern at Airseat.in- 2018

- The Internship was done under their BMAD Summer Internship Programme 2019. It comprised of me managing their social media accounts and creating content for their social media handles.
- Adobe Premier Pro, Adobe Lightroom, Photoshop

Final Year Dissertation – An Extensible System for Robust Recommendation Framework – 2021

- The project comprised of a recommender system which provides relevant/similar recommendations based on the Hyper-localised results in an area and giving preferential results based on local ranking giving accurate results.
- Python, Numpy, Sci-learn, Web Technologies, Bootstrap

Research Paper– Predicting Online Sales of Products using Sentimental Analysis of user Reviews– 2019

- The project was a case study of the online sales of products and tackle the problem of mining reviews for predicting product sales performance
- Algorithms like ARSA, PLSA(S-PLSA) and ARSQA were used to analyse data.
- We we're able to get the possible predictions by analysing the reviews of the product and produce a report on the product's user's liking/disliking.

ADDITIONAL INFORMATION

- Could research on current trends in the telecom and mobility sector of the current market as well as the technology sector.
- Could Build Computers and upgrade them easily. P.S Built my own PC at the age of 15.
- Was also able to do a bit of SEO/SEM on websites. Had worked on a YouTube channel to help them get more views. (Try googling any of the keywords like “**gaurav kesarwani17**”, “**gaurav Kesarwani 17**” or “**kesarwani17**”)
- Learned HTML5/CSS3/Bootstrap, Introduction to Machine Learning in the lockdown.
- I was one of the founding member of Mi Fan Club Lucknow.
- Hobbies/Extras –Financial and Investment research, Global News and information views, Online gaming and Learning about new devices and technologies.
