

CURRICULUM – VITAE

Work Objective

Seeking a challenging role in an organization as a software developer where I can utilize my strength and skills. I would like to work in a competitive environment, where I can get opportunities to meet new challenges to excel and prove my persona to the infinite extent with complete satisfaction.

Academic Qualification

- Passed **MCA** from Swami Vivekananda Subharti University, Gorakhpur (UP).
- Passed **BCA** from Integral University, Lucknow (UP).
- Passed Intermediate from UP Board
- Passed High School from UP Board

Work Experience 5+ Years

Software Developer | Hipster inc (Lucknow) | [07, 2021] – Present

- ◆ **Project Contributions:** Contributed to multiple high-impact projects, including Near App, SomethingNew, MBMAS, Smart (NUS), and Pintek, focusing on backend optimization, secure API integration, and user-centric feature development.
- ◆ **API Performance & Security:** Achieved up to a 30% reduction in API response times across applications by optimizing backend processes, significantly enhancing user experience. Strengthened API security protocols to protect user data and ensure compliance with best practices.
- ◆ **Chat Socket Integration:** Integrated real-time chat socket functionality, facilitating fast, low-latency communication within applications and enhancing user engagement.
- ◆ **Third-Party API Integration:** Successfully implemented third-party APIs, including image processing services, Google Maps for geolocation services, and Firebase Cloud Messaging (FCM) for push notifications. These integrations expanded app functionality, improved location-based features, and enabled seamless communication with users.
- ◆ **Feature Development:** Built and deployed backend features using PHP (Laravel, Yii2) and Node.js, designed to enhance app scalability, real-time processing, and interactive functionality. Ensured these features aligned with project goals and contributed to a cohesive user experience.
- ◆ **Continuous Optimization:** Identified and resolved bottlenecks within the development pipeline, increasing API response speed and improving team efficiency by approximately 20%. Implemented best practices in performance optimization and security.

Software Developer | Ferry infotech (Lucknow) |[10, 2020] – [06, 2021]

- ◆ **Project Management & Development:** Led backend development for an MLM project, optimizing

database architecture and improving transaction efficiency, which contributed to a smoother operational workflow.

- ◆ **E-Commerce Development:** Built a secure, high-performance eCommerce platform with an integrated payment gateway, enhancing the site's load speed and transaction security by implementing industry-standard protocols.'
- ◆ **Payment Gateway Integration:** Successfully integrated a reliable payment gateway, improving transaction speed and securing sensitive payment data, which resulted in a safer and faster checkout experience.
- ◆ **Security & Performance Improvements:** Optimized the eCommerce application's backend, implementing advanced security measures and performance tweaks, leading to an overall improvement in load times and transaction processing reliability.

Software Developer | CodingClave.Tech (Lucknow) |[08, 2019] – [07, 2020]

- ◆ **E-Card Platform Development:** Built **E-Card Adwale.in**, a digital platform for creating and managing e-cards, incorporating features like customizable card templates and automated email delivery for efficient user engagement.
- ◆ **Laravel Mailer Integration:** Implemented Laravel Mailer for automated email communication within applications, enabling reliable email notifications, password resets, and customer engagement emails to enhance user experience and functionality.
- ◆ **Database Management with Laravel ORM:** Utilized Laravel's ORM (Eloquent) for effective database interaction, creating a streamlined and efficient data handling process. This facilitated easier data management, quicker query resolution, and reduced development time.
- ◆ **Backend Development & Optimization:** Focused on optimizing backend logic and database queries to improve application response times, contributing to a more seamless experience for end-users.

Software Developer | Mega Infomatix Solution (Lucknow) |[11, 2018] – [08, 2019]

- ◆ **Photo Search API Implementation:** Designed and implemented an API for searching and filtering property images based on color combinations and other attributes. This feature allowed users to find properties that matched their specific preferences, improving the overall user experience.
- ◆ **Backend Functionality for Image Management:** Developed backend solutions for uploading and managing property images, ensuring that images were easily accessible and efficiently organized. Implemented processes to handle image uploads seamlessly, contributing to a smoother workflow for content management.
- ◆ **Color Generation System:** Created a color generation system that enabled users to filter properties by color preferences, enhancing search capabilities and allowing for a more personalized experience. This innovative feature added significant value to the platform by catering to user aesthetics.

- ◆ **Database Design and Optimization:** Designed and optimized database structures to support the website's functionalities, ensuring efficient data retrieval and management for high-volume property listings.

Technical Skills

- **Backend :** PHP (Laravel, Yii2, CodeIgniter), Node.js, Golang
- **Frontend:** Express-hbs, ReactJs, Html,Css ,Bootstrap
- **Database :** MySQL (Stored Procedures, Triggers, Views), MongoDB
- **Other:** APIs, Chat Socket integration, Payment Gateway ,GIT, Ajax, Fcm, Google Cloud, Pub/Sub

Current Company Projects

SomethingNew (Singapore)

- ◆ **Technologies:** Laravel for backend and APIs; Node.js for real-time socket communication.
- ◆ **APP:**<https://play.google.com/store/apps/details?id=com.apps.somethingnew&pli=1>
- ◆ **Description:** SomethingNew is an anonymous and concurrent text counselling app. It provides assurance, empathy, and insight to the public, organizations, and institutions as a form of mental well-being service.

Near App (Singapore)

- ◆ **Technologies:** PHP Yii2 for backend and APIs.
- ◆ **APP:**<https://play.google.com/store/apps/details?id=com.nparks.near>
- ◆ **Description:** The NParks Explore A Route (NEAR) mobile app is NParks' first augmented reality (AR)-enabled mobile application. It was developed to complement NParks' trails and PCN for an interactive curated walking experience island-wide.

NUS Smart App (National University of Singapore)

- ◆ **Technologies:** Laravel for backend and APIs; Node.js for real-time socket communication.
- ◆ **APP Url:** <https://play.google.com/store/apps/details?id=edu.nus.smart>
- ◆ **Description:** smart is a comprehensive platform designed to support mothers throughout their pregnancy and post-childbirth journey. It offers a wide range of educational resources covering emotional care, self-care, and infant care. The platform specifically targets mothers who are single, have experienced past trauma, are of low income, or are at risk of postnatal depression.

CountryZipCode (India)

- ◆ **Technologies:** Node.js for backend and APIs; Angular for frontend.
- ◆ **Description:** A platform providing postal code information and location-based services.

Pintek (Indonesia)

- ◆ **Technologies:** Laravel for backend and APIs.
- ◆ **Description:** An educational platform that connects students with various learning resources.

Personal Details

Name -- Jisan Ahmad
Date of Birth -- 19-06-1998

Marital Status -- Unmarried
Nationality -- Indian
Sex -- Male

Declaration

I solemnly declare that the above information is true and correct to the best of my knowledge. I understand that if any information given above is found false/incorrect, my candidature is liable to be rejected.
