EDUCATION

Graphic Era Hill University (Current)

Master Of Computer Application (M.C.A)

CGPA: 7.6

Relevant Coursework: Data Analysis, Software Engineering; Operating Systems; Algorithms; Machine learning

Dehradun, India

Aug-2022

Shri Ramswaroop Memorial University

Bachelor Of Computer Application (B.C.A)

Relevant Coursework: Java, Web Development, Discrete Mathematical Structures, Introduction to Management, Frameworks

Lucknow, India

Jul 2019 - Jul 2022

SKILLS

• Python • SQL • Excel • Java • Spring boot • Chatter Bot • Data Structures & Algorithm • OOPs • Data visualization (Power BI)
• Statistical Analysis (NumPy, SciPy) • MS Excel • SDLC • Computer Networks • System Design • Operating System • Git
• Problem Solving • Communication Skills

PROJECTS

- Title: "JavaFlix: Smart Movie Ticket Booking with AI Assistance"
 - "Initiated and spearheaded the dynamic project, 'JavaFlix: Smart Movie Ticket Booking with AI Assistance.' Conceptualized and developed a Java-based movie ticket booking system, seamlessly integrated with an AI-powered chatbot.
 - Enhanced user engagement through a swift and personalized experience. Implemented machine learning algorithms, leading to insightful movie recommendations. Transformed the movie ticket booking process, creating a tailored and immersive cinematic journey for users.
- Title: "Climate Change Data Analysis"
 - The Climate Change Data Analysis project is a comprehensive web-based dashboard built with React and JavaScript, aimed at visualizing and analyzing various aspects of climate change.
 - Leveraging datasets from reputable sources such as NASA, NOAA, and IPCC, the dashboard presents interactive charts, maps, and graphs to depict trends in temperature, sea level rise, carbon dioxide emissions, and other key indicators of climate change
- Title: "Currency Converter"
 - The React Currency Converter project aims to create a user-friendly web application that allows users to quickly and accurately convert between different currencies. Leveraging APIs for live currency exchange rates, the application provides up-to-date information, ensuring the most precise conversions
 - Users can select their base currency and target currency, input the amount, and instantly see the converted value. The project utilizes React for building a dynamic and responsive user interface, while APIs fetch real-time exchange rates, enabling seamless currency conversions.

CERTIFICATIONS & TRAINING

- Java development Virtual Internship (Codesoft) Aug 2023-Sep 2023
Certificate no: CS07WX46881
 - "Dynamic intern in Java development at Cod Soft, accomplished 80% completion of weekly tasks, showcasing proficiency in Java programming and dedication to achieving project objectives through my technical skills."
 - Completed Project Tasks: • Guessing Number Game • ATM Interface • Currency Converter • Student Grade Calculator.
- Work Smarter with Microsoft Excel (Coursera)
 - In this I learn how to create a spreadsheet, work with formulas and functions, make your spreadsheets look professional, and print a spreadsheet.
 - In this I learn how to manage worksheets, workbooks, tables table data, data cells and ranges, and charts.
 - Also How to perform operations by using formulas and functions.
- Python for Data Analysis: NumPy and Pandas (Coursera) Oct 2021-Dec 2021
Certificate no: EWFEUH9Y27RA
 - "Python and their libraries enthusiast with foundational knowledge gained from a comprehensive Coursera course. Eager to apply acquired skills in real-world projects and contribute to dynamic development environments."

ADDITIONAL

Languages: English, Conversational Proficiency in Hindi

Hobbies: Problem-solving Challenges, Reading about trendy Technology, Open-source Contribution
