OBJECTIVE- Results-oriented Project Manager with 8.6 years of experience in successfully delivering complex projects, leading cross-functional teams, and managing client relationships. Adept at collaborating with customers to develop and present comprehensive technical solutions, I have overseen installations and technical implementations across various industries. With extensive expertise in data center environments, network infrastructure, and software products, I facilitate seamless communication between internal teams and stakeholders. Skilled in risk management, resource optimization, and technical issue resolution, I ensure projects are completed on time and within budget. My strong leadership, organizational abilities, and exceptional communication and presentation skills enable me to drive global projects while maintaining alignment with client objectives.

EDUCATION-

DEGREE	INSTITUE/UNIVERSITY	YEAR OF PASSING
B. Tech	SASTRA University	2016

EXPERIENCE-

Project Manager – Innovapptive Global Solutions Pvt. Ltd (08/2024 to Present)

- Managed end-to-end implementation of enterprise SaaS projects, delivering solutions worth over \$300,000+ across oil & gas and manufacturing clients.
- Directed project plans across mRounds, mWorkOrder, and mInventory with on-time delivery and strict adherence to scope and budget.
- Handled \$185,000+ in client change requests without scope creep, improving stakeholder satisfaction and enabling long-term account growth.
- Streamlined project tracking and communication using JIRA, Smartsheet, and PowerBI, improving delivery efficiency by 25%.
- Built strong client relationships by aligning delivery with business outcomes, achieving CSAT scores consistently above 90%.
- Facilitated cross-functional coordination between product, engineering, and client teams, ensuring alignment and issue resolution throughout the lifecycle.

Product Owner - Innovapptive Global Solutions Pvt. Ltd (11/2022 to 08/2024)

- Owned the full lifecycle of SaaS products (mRounds, mWorkOrder, mInventory), aligning product strategy with enterprise client goals.
- Defined and managed 300+ user stories and epics in JIRA, translating business requirements into actionable product features.
- Led cross-functional collaboration with engineering, design, and QA to deliver 12+ major feature releases, boosting platform adoption by 40%.
- Implemented Agile best practices like sprint planning, backlog grooming, and retrospectives, reducing feature delivery cycle time by 30%.
- Initiated data-driven product decisions using customer feedback, field insights, and Mixpanel analytics, resulting in a 20% reduction in support tickets.
- Delivered stakeholder demos, roadmaps, and release notes, increasing transparency and internal alignment by 35%.

Tech Mahindra – Senior Associate Analyst (11/2020 to 11/2022)

- Led the end-to-end implementation of the SAP PM solution, ensuring seamless system integration across all platforms.
- Successfully managed \$50,000 in change requests, surpassing target milestones and ensuring on-time project delivery.
- Conducted post-implementation reviews to capture key insights and drive continuous process improvements for future projects.
- Configured and optimized preventive maintenance schedules, achieving 100% compliance with SAP PM standards and improving delivery efficiency by 15%.
- Developed detailed project schedules, tracked progress, and delivered comprehensive reports to senior management, enhancing project transparency by 20%.
- Aligned stakeholder expectations and facilitated requirements-gathering sessions, reducing rework by 10% and ensuring consistent achievement of project objectives.

Capgemini India Pvt. Ltd – Senior Analyst (03/2018 to 11/2020)

- Identified and resolved client issues while maintaining clear communication and ensuring efficient solution delivery.
- Conducted in-depth project analysis, defined requirements, assessed risks, and generated performance-tracking reports.
- Facilitated requirements-gathering sessions with stakeholders, ensuring alignment with project goals and client expectations.

Surin Automotive Pvt. Ltd – Manufacturing Excellence & Production Engineer (03/2016 to 02/2018)

- Increased production efficiency by 20% and reduced downtime by 15% through in-depth bottleneck analysis and strategic corrective measures.
- Implemented Six Sigma methodologies to enhance cycle times by 34% and cut operational costs by 10%.
- Developed and managed production schedules to maximize resource utilization and ensure timely process completion.
