

Nivedita Tiwari

+91-9721810605 — niveditatiwari53@gmail.com — [Linkedin](#) — [Github](#) — [GeeksForGeeks](#)

Summary — Computer Science Engineering student skilled in full-stack web development (MERN) and building scalable, high-performance cloud-based systems. Passionate about optimizing functionality and enhancing user experience in distributed environments.

Skills

Technical Skills:- Programming Languages – Python, C/C++, JavaScript, Java, C — Web Technologies – React, Node.js, Express.js, HTML5, CSS3, MongoDB, RESTful APIs — Cloud DevOps – AWS, Linux, Docker, CI/CD Pipelines — Tools – Git (Version Control)

Courseworks:- DBMS, Operating Systems, Computer Networks, Data Structures and Algorithms, Web Technologies, Cloud Computing

Soft Skills:- Leadership, Teamwork, Analytical Skills, Effective Communication, Project Management.

Experience

Orion Led

April 2025 – June 2025

Engineer Trainee, On-site

- Designed CMS tools using React and Node.js to manage modular LED display content for marketing campaigns.
- Developed backend APIs using Express and MongoDB, integrated file upload handling (Multer) and user auth with JWT.
- Boosted CMS efficiency by 15 percent via dashboard optimization and component caching using localStorage.

Auranics Solutions

May 2024 – June 2024

Web Developer Intern, Remote

- Developed admin-facing dashboards and product APIs using Node.js, MongoDB, and Express; integrated search filtering using MongoDB indexes.
- Built reusable React components with context-based state and form validation using Formik and Yup.
- Deployed builds using GitHub Actions CI/CD.

Education

Amity University Uttar Pradesh

2021-2025

Bachelor of Technology in Computer Science and Engineering

- Achieved a Cumulative Grade Point Average (CGPA) of 8.60/10.0, demonstrating strong academic performance in core computer science subjects.

Certifications and Achievements

- CISCO Python Essentials I and II certifications
- Enhancing Soft Skill and Personality by NPTEL.
- Contributed to 3 ALIAS open-source projects, showcasing collaboration and web/data structure skills.
- Finalist in national debates (Top 5 percent of 200+), securing a Top 3 team position.
- Designed and led seminars for 50+ attendees, with 25 percent contributing to open source within 3 months.
- Reached Semi-Finals in IIT Madras Embedded Security CTF, ranking in the top 15 percent of 300+ teams.

Projects

LED-CONFIGURATOR

April 2025

Configurator

- Developed an interactive LED Configurator Wizard enabling users to design custom LED display setups with real-time visualization of pixel pitch, screen size, and resolution.
- Implemented dynamic UI logic using modern JavaScript frameworks (e.g., React, Tailwind) to render scalable display layouts and generate component-level configuration outputs.

Rojgar Bharat

May 2024

Full Stack Web Application

- Created 'Rojgar Bharat', a comprehensive full-stack application (MERN-based), connecting over 500+ daily wage workers with employers.
- Integrated core functionalities including user profiles, efficient job posting and search mechanisms, and intuitive schedule management systems, facilitating over 200 job matches monthly and improving employment access.
