

Sachin Bajpai - Quality Engineering Lead

Contact No: 7007505120

Email id: qc.sachin@gmail.com

Passport No: T7370396

Summary

- Result driven professional with 14 Years of experience in the field of IT with focus on Specification based Testing, Manual Testing & Experience based Testing of Web Applications, Android Applications, and iOS Applications.
- Expertise in end-to-end testing, including Test Plan and Test Case design documentation, Test Execution Reports and Defect Management.
- 8 Years of leadership experience, managing high performance teams (Up to 8 members).
- Proven track record in delivering high quality UAT and Production releases in Mortgage Industry and Call Centre and other domains.
- Adept at client interaction, including Production release discussions, task allocations, task execution and providing Sign-off.
- Rich experience in successfully delivering large scale projects throughout work tenure in Agile/Scrum methodology
- Experience in identifying and fixing web application security vulnerabilities.
- Experience in working with multiple vendors and geographically distributed teams.
- Conducted all type of testing i.e., Mobile testing, Functional Testing and change-related (confirmation and regression testing) during the various phases of the application.

Technical Skills

- Software Q/A: SDLC, STLC, Specification based Testing techniques, Test analysis, Test Design, Test Implementation, Quality Assurance/Control, Test Strategy, Mobile Testing, Manual Testing, Functional Testing, System Testing, Cross Browser/Platform Testing, User Acceptance Testing, Integration Testing/Regression testing
- Test/Bug Management Tools: Jira, X-Ray, Zephyr, Mantis, Trello
- Database - MySQL

Professional Awards:

- Best Team award working with Nice Systems for e.Soft Technologies
- Client appreciation for handling Production release without a single escalation in 3 Years.
- Consecutive Insta Awards for Jan 2024 and July 2024 from Infosys

Total Work Experience:

Company	Designation	Duration
Infosys Limited	Quality Engineering Lead	December 2021 – Till Now
e.Soft Technologies Limited- Lucknow	Sr. QA Engineer	October 2015 – November 2021
Singsys Pte. Ltd - Lucknow	QA Team Lead	March 2014 - October 2015
Unicode Systems - Lucknow	QA Engineer / QA Team Lead	June 2011 – January 2014

Project Details:

1. Project Title: PennyMac Financial services (Infosys Limited) Duration:

From January 2022 to till date

Description: PennyMac Financial Services, Inc. is an American residential mortgage company headquartered in Westlake Village, California. The company's business focuses on the production and servicing of U.S. mortgage loans and the management of investments related to the U.S. mortgage market.

Role and Responsibilities:

- Conducted in-depth analysis of business processes, identify key areas for improvement, and recommend strategic solutions for Production Releases to stakeholders and team members.
- Conducted stakeholder interaction to elicit and document user requirements, translating them into actionable project tasks on Staging and Production environments.
- Facilitated user acceptance testing (UAT) sessions for Stage and Prod environments, ensuring seamless implementation of solutions and user satisfaction.
- Establishing robust QA Processes by defining standards, workflows, and best practices to ensure consistency and quality across projects.
- Provided QA Sign-off after verifying Test Plans, Test Cases and ensuring quality standards were met for QA and Production releases so that business continuity is maintained within the stipulated timeframes and guidelines.
- Collaborate with developers to understand issues and assist in debugging them.
- Conducted daily stand-ups, status meetings among team members and tracking testing progress.
- Mentoring new team members by providing training on testing tools & domain knowledge, ensuring seamless onboarding and skill development. Acted as a guide for troubleshooting, reviewing deliverables and fostering collaboration to enhance team efficiency.

Tools & Technology used: - Desktop & Web Encompass, JIRA, Confluence, Salesforce, Excel, Slack

2. Project Title: WORKFLEX (e.Soft Technologies) – Acquired by NICE Systems Pune and known as EEM

Duration: From October 2015 to July 2021

Platform: Platform Independent

Environment: Core Java, JSP, Servlets, Hibernate, MySQL

Role: Sr. QA Engineer

Project Objective: To develop an application which has evolved into the more integrated, demand- oriented workforce management, this includes changes in personnel requirements and objectives when optimizing the scheduling of staff. Besides the two core aspects of demand-orientation and optimizations, Workflex furthermore incorporates:

- Forecasting of workload and required staff
- Integration of employees into the scheduling process
- Management of working times and accounts
- Analysis and monitoring of the entire process.

Role and Responsibilities:

- Directly involved with client for requirement analysis & providing the demo to the clients.
- Analyzed specifications and test plan for the testing process of "Workforce Management" Applications & Developed test cases after analyzing the specifications Document.
- Testing the developed application against specified requirements.
- Conducted all level of testing i.e. Integration Testing (Component Integration Testing & System Integration Testing), System Testing, User Acceptance Testing.
- Conducted all type of testing i.e. Database Testing (structural), Functional Testing and change-related (confirmation and regression testing) during the various phases of the application.
- Designed and executed test cases as per schedule.
- Testing application to identify and resolve problems from an end user's perspective.
- Sending the status to the Team lead. Liaising with developers and programmers to swiftly resolve faults. Analyzing, writing reports & communicating results to colleagues & Project/QA Manager.
- Participating in regular, weekly project status meetings related to Testing with Teammates, Test lead and Project manager.

3. Project Title: Olympus Application**Company:** Singgys Pte Limited**Platform:** Platform Independent**Environment:** PHP, SQL, Mantis **Role:**

Sr. QA Engineer / Team Lead

Project Objective: The project enables the provisioning of online product selling for Olympus Singapore, Olympus Malaysia & Olympus Thailand including Cameras, Lenses, Binoculars, Audio equipment, Scientific solution, and related accessories.

Role and Responsibilities:

- Testing application to identify and resolve problems from an end user's perspective.
- Testing the developed application against specified requirements.
- Involved in Designing and executing Test Cases Functional Testing, System Testing, UAT Testing.
- Liaising with developers and programmers to swiftly resolve faults.
- Analyzing, writing reports & communicating results to colleagues & Project/QA Manager.
- Participating in regular, weekly project status meetings related to Testing with Teammates and Project manager.
- Client Interaction and requirement handling, sending weekly status to client.
