APT Technosoft Pvt Ltd

Projects

MageNative App-<https://play.google.com/store/apps/details?id=com.shopify.shopifyapp>

Platform - Shopify The Shopify App Store is a marketplace where Shopify users can find apps to add to their stores. There are currently over 2,200 apps available on the Shopify App Store. The Shopify App Store offers a wide range of features for businesses of all sizes.

Role - Worked on segments of app with functionality including dynamic homepage (Homepage setup can be done from MageNative panel as per user requirements) Integration of various third-party Shopify-based apps (such as Flits Customer Account Pages, Wholesale Pricing Discount, Judge. me, Simply Otp) Integration of Shopify's native functionality such as Cursor Pagination, Shopify Filters, Subscription products. Multi-lingual functionality support for localization of the app. Customers can easily log in through social login(Facebook, Google).

Client-Based Customization using Magenative App Worked on projects with over 50+ clients. Integrated third-party apps as per clients' requirements such as Zapier shipping and delivery app, Weglot Translation, Searchnizer, Ultimate Search and Filter, etc.

Customer Maintenance Management System

Customer Maintenance Management System

Worked on the project in the MCA assignment

CMMS is a software that maintains a computer DB of information about an organization's operations. This information is intended to help maintenance workers do their jobs more effectively and to help management make informed decisions.

Front End: ASP.NET

Tool /Framework: Visual Studio

Database: MySQL Server

Bank at Finger Tips

Worked on the project in the MCA assignment

Bank Management System is a major project. It is used to keep the records of clients, employees, etc. in the bank. The system provides access to the customer to create an account, deposit / withdraw cash from their accounts, also they can view reports of their accounts.

Front End: Asp .NET

Tool / Framework: Visual Studio

Database: MySQL Server
