Work Experience

Java developer (11/2022 - 1/2023)

GFN D'selva Infotech (Sikandra,Agra)

I did complete my 3 month internship in java technology and during internship I did work on backend in java and also I did work on frontend and during internship I created few report using Jasper Report. and during Internship I did develop one project The Project name is HR Payroll and management system.

Python Developer (8/2022 - 9/2022)

Remark skills (Remote)

I did complete my python Internship and during internship I did work on GUI Graphic and Tkinter using python programming I did develop one project The project name is stock management system.

Projects

HR Portal

- The HR portal's goal is to provide employees with the preferred location for a variety of functions. It also aids in automating tasks such as updating personnel details, leave, reports, and other administrative tasks. and In this project I did work on backend.

Stock management system

- The purpose of stock management software is to maintain an optimal stock level, track goods during transport between locations, receive new items, manage warehouse processes such as picking, packing, and shipping, prevent product obsolescence and spoilage, and ensure your products are never out of stock.
