OBJECTIVE

Full Stack Developer proficient in HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and TypeScript, focused on building responsive, user-friendly, and scalable web applications. Passionate about creating dynamic front-end interfaces and efficient back-end systems to deliver seamless digital experiences.

SKILLS AND INTERESTS

Programming Languages	C, Java, JavaScript, python
Frontend Technologies	HTML5, CSS3, Tailwind CSS, React.js, Bootstrap
Database	SQL, MongoDB
UI/UX Design	Figma
Version Control System	Git, GitHub
Soft Skills	Critical thinking, Data-driven decision making, Project ownership

EDUCATION

School of Management Sciences, Lucknow	Oct 2022 - June 2025
Bachelors of Computer Applications (BCA)(74.39%)	

EXPERIENCE

Web Developer Intern | CodeSoft :Oct 2024 - Nov 2024

- Designed, developed, and deployed responsive web applications using React.js and HTML5, enhancing user engagement by 30% with interactive features and a mobile-first approach.
- Built dynamic and reusable React.js components to improve UI functionality and user experience.
- Conducted comprehensive cross-browser testing, ensuring consistent performance and achieving 95% usability across various devices and platforms.
- Collaborated with a cross-functional team, delivering high-quality projects on schedule while adhering to Agile methodologies.

CERTIFICATIONS

- IBM SkillsBuild (Getting Started with Artificial Intelligence)
- Advanced Diploma in Computer Applications.

PROJECTS

Responsive portfolio website :built with HTML5, CSS3, and JavaScript

- Responsive Design: Built with a mobile-first approach using CSS Flexbox and Grid for seamless compatibility across devices.
- Interactive Features: Integrated JavaScript-driven components like smooth scrolling and enhance user engagement.
- Performance Optimization: Implemented lazy loading, image optimization, and faster load times and improved efficiency.
- Clean and Modular Code: Developed reusable and scalable components with semantic HTML5 and modern CSS3 practices for easy maintenance..

Netflix clone:(full stack web application)

- **Frontend:** Built with HTML, CSS, and JavaScript (React/Next.js), offering interactive features like video playback and user profiles.
- **Backend:** Powered by Node.js and Express for handling user authentication, content management, and streaming logic.
- **Database & Cloud:** MongoDB stores user and content data, while AWS handles video storage and delivery for efficient streaming.
- **Payment Integration:** Uses payment gateways like Stripe to manage subscriptions and access to premium content.

EXTRA-CURRICULAR ACTIVITIES

Smart India Hackathon -

Participated in the **SIH (Smart India Hackathon)** Qualified at the college level and developed a prototype for a farmer app, focusing on bridging the gap between farmers, consumers, and retailers.

Techtrek Hackathon: The team secured second position, demonstrating strong innovation and problem-solving skills in a highly competitive environment. This achievement highlights their ability to deliver high-quality solutions under pressure.
